

Handcuff Cases

ASP Handcuff Cases are a benchmade blend of the finest materials in a series of clean, functional designs. Each case incorporates an integral back pocket and auxiliary and handcuff key. Centurion, Duty, Federal and Double cuff carriers are available in Black, Basketweave, Ballistic and ASPtec®.

Centurion and Federal cases are produced using corner stitch construction. Duty and Double carriers have elastic side walls. Combination cases are constructed of precision molded EVA. They retain a Tactical Baton® and restraint. Investigator cases are concealable and attach rapidly to the belt. Tactical carriers are constructed of ballistic weave nylon with hook and loop flap. Exo cases are minimalistic with positive restraint retention.

ASP Handcuff Cases incorporate an injection molded Snap-Loc® clip attachment with Slide Track belt width adjustment. The cover of the belt clip incorporates a handcuff key pocket.

Classic Carriers with a Hidden Advantage

Centurion cases incorporate a protective cover and are constructed with an inset back.

Each ASP Handcuff case incorporates a key pocket.

Duty carriers incorporate a self adjusting cover. Their elastic side walls secure Chain or Hinge cuffs.

Double Cuff cases secure restraints with a protective cover and elastic side wall technology.

Federal cases have an inset back and pull through retention strap.

Exo cases are injection molded with positive restraint retention. Rigid Exo carriers rotate 180 degrees to seven distinct positions. Exo Snap-Loc® clips attach to any duty belt, dress belt or MOLLE vest. The carriers lock cuffs securely in place. They can only be accessed by means of a two staged release. The open case design is both ambidextrous and instantly accessible.
