

## **\*Warning\* Porsche PDK Limited Slip Differential**

Thank you for purchasing our OS Giken Super Lock LSD for your PDK Transmission for PTV and non-PTV equipped Porsche's.

This notice is to notify you that Porsche does not have differential side bearings available for purchase. We have worked with various bearing manufacturers to find a suitable replacement bearing that matches the OEM supplied bearing and have not been able to find one. Because of this you will need to safely remove the factory bearings off the OEM differential for reuse with our unit.
