

## Floating Bed Fabric Color Combinations

This doc has 7 pages of color-coordinated Sunbrella fabrics that will go well together on your Bed. You can also judiciously mix & match different fabrics from among the following themes.

Sunbrella is the highest standard for durable waterproof indoor-outdoor fabrics.

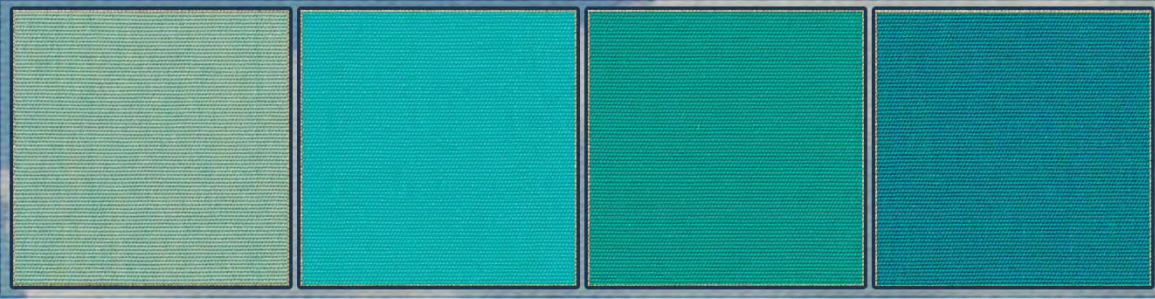

They change their offerings periodically, so be aware that more obscure or patterned fabrics may be discontinued without warning. However, we can match them with something close.

You may reach out to us via email or phone (641 472 2159) for a personal fabric consultation.

floatingbed

### Zen Minimal Theme:

Oyster  
for Mattress Cover

Natural  
for Pillows

Cadet Grey  
Tent,  
Top Cap

Silver  
Frame Wrap,  
Stand Leg Wraps

Consider that light colors (for example pure white, or the Zen Minimal Theme above), especially when used outdoors, will show dirt more quickly if they are not protected by a tent or roof overhead. We can provide white, or bright colors (like Spectrum Daffodil), but for that reason we don't show many of them in the recommended samples.

The next page of tweeds are popular, because two-tone fabrics generally require the least care of all. They are better at hiding dirt, tree leaves or debris over the long term, if you want the lowest maintenance possible.

This can be especially useful on an outdoor Bed.

You can use them singly or mix and match, as before.

Happy Floating!

**See the next 2 pages for other Sunbrella colors – tweeds, and 2 example light solids that are easier to keep clean than white.**

**Shade sail colors are on the last page.**

**Tweed options include:**

Hemlock Tweed #6005

Dubonnet Tweed #6006

Charcoal Tweed #6007

Mocha #6016

Linen Tweed #6054

Heather Beige #6072 (solid with mixed threads)

Cadet Gray #6030

Silver #6051

These 2 solids require less frequent cleaning than white for outdoor use, if you want a light color.

The two most natural-looking colors for the shade sails are cream and bamboo.  
(The other 3 color shade sails are available as well - red, blue and green - but they look cheaper, more “synthetic” in person, and you probably won’t like them.)
