

Health Benefits of The Floating Bed®

It's about more than just looks.

“Floating” Motion can help you sleep better, live better, & longer.

The Bed Of Your Dreams.

Pat. #7367068

v1901

“The Floating Bed always sends me into a deep and calm slumber. I miss it when I am away and always look forward to its gentle rocking when I return home.”

- *Woody Harrelson, actor, health advocate.*

A Better Way to Sleep, Relax & Recuperate.

If you are sleeping like the “average American,” your health is being compromised every night. Stress, overwork, the fast pace of life, many things contribute to our modern habit of unhealthy sleep.

Many studies show sleep quality is the #1 indicator of long life, even more than diet or exercise. Those who sleep better, live better too. They do better at work, in relationships, have fewer accidents, & stronger immune systems. Better sleep will dramatically improve your health.

What if your bed could actively contribute to your health, not just lie there? What if it could even make sleep more enjoyable too?

Nature solved the problem a long time ago. It's called **Omni-Pendulum** or “**Floating Motion.**” Scientific studies show many benefits of rocking. But all motion is not equal; “Floating Motion” is the only **relaxing** motion. That's why the Floating Bed hangs from one point, for this perfect motion. It was designed from a blank slate, not for looks, but for maximum benefits. Most importantly, it really feels great too. You feel almost weightless, as if you are floating.

This is a major, scientifically proven sleep & health breakthrough.

Floating Motion has many benefits.

First, it is a **proven, natural sleep aid.** Why? We all spend our first nine months floating, gently rocking in mother's womb. Nature chose this ideal motion for its calming effect. It activates a deep, powerful relaxation response. Of course everyone intuitively rocks babies from head to toe, with the same motion. So it already worked for you - just ask your mother!

Now EEG & other scientific studies show that people sleep better, with more stage 3 sleep (the deep healing stage) with this gentle motion.

In a recent study people entered deep sleep faster, with more hemispheric synchronicity, when gently rocking. Brain scans show fewer fast agitated waves, & more “sleep spindles,” indicating higher quality rest & healing. Used as a sofa, the group's waves may entrain, harmonizing the group.

Rocking increases blood and most importantly, lymphatic circulation, while sitting or sleeping. You know that your heart pumps oxygen & nutrients to the cells. Fewer people realize that our cellular “drain system,” which carries the toxins away, is the lymphatic system. But lymphatic circulation is not driven by your heart at all, because it has no pump - it requires motion.

Your body's plumbing system is like the one in your home. Your heart pumps oxygen & nutrients into the cells, just like the faucet forces water into the sink. But if your sink drain is sluggish, it overflows. That is like what happens in your body when you stop moving; cells fill up & overflow with waste products, until you move again.

In fact, without motion, you will literally die. People with inadequate motion quickly develop serious health problems. Studies show that the more sedentary you are, the younger you die. People who are bed-ridden must be “turned” every

few hours, or they die. After surgery, patients are required to get up & move around right away, because rocking speeds up post-operative recovery, and reduces pain. **And, it feels good!**

Motion speeds the flow of your circulation by decreasing lymphatic back pressure. This reduces soreness, aches, back pain, & swelling in the body, in minutes. Reducing swelling is a first principle of healing. Rocking creates a subtle pumping action that increases circulation between spinal discs and other joints, bathing your cells in fresh nutrients. Your body recognizes this & sends signals of pleasure, to encourage you to continue the motion. Muscles stretch & relax in response. This is much more relaxing than simply lying down.

More Motion = Better Health. Gentle motion at night provides better sleep, less stiffness in the morning, & better health. Studies show that rocking reduces stress, & even improves dreams. Users report relief for many conditions, such as restless leg syndrome & circulatory problems.

Omni-Pendulum motion can cure motion sickness too. How this happens is not fully understood, but well documented. One theory is that rocking puts accumulated toxins into circulation, then sweeps them out. Children rarely have motion sensitivity. Yet many adults do, & it gets worse with age. Ironically, the thing sufferers avoid (motion) is the cure. **Fortunately, this cure is actually enjoyable!** You begin very slowly, & increase over about 4 - 6 weeks. Omni-pendulums have been used for centuries to train sailors, painlessly.

Other benefits of Motion - "Vestibular Therapy"

Motion increases learning, communication between the brain hemispheres, & helps balance them. Studies show benefits for Autism, ADD, CFS, & many health conditions, thanks to increased concentration, attentiveness, learning, balance, body awareness, & more. (Call for other conditions, therapy use, insurance, etc.) It is fun too, so everyone wants to enjoy it!

During rocking, lymphatic circulation increases while you are in a relaxed physical, emotional, and mental state. This is a very positive state for healing. Modern life is deficient in motion, which our ancestors got through activity. **Motion restores life.**

Heavenly Bedroom

Holds a crowd: "Blood, Sweat & Tears" band & VIPs backstage at concert

The right motion makes all the difference.

No other bed has this motion. It is far better than all previous beds (like waterbeds, hammocks, etc). "Floating" is the most simple, stable, predictable motion, and the only one suitable for a bed, or for relaxing. It is the only motion that tells your **Vestibular System**, and sympathetic nervous system, that you are safe to relax.

All previous motional beds are disturbing, as they move you up, down, or lurch side-to-side. They toss 3.

you around unpredictably. Those motions creates chaotic waves in the fluid in your inner ear, your **Vestibular System**. That indicates potential danger, so your balance system tells you not to relax, to keep you safe. That is why those beds were not popular.

Omni-Pendulum Motion is best. Our bed arcs very slowly, gently, smoothly up as it swings, to hold you perfectly in place. You will not fall out. Your inner ear fluid is calm, undisturbed - just like you. (Just as when you swing a bucket of water over your head, the water stays put; it does not slosh around, or fall out - try it & see!) Unlike other motional beds, you are not tossed around. The “floating” arc cradles you, so you move with the bed, almost unaware of the motion. This is the only “safe” motion, and your body instantly recognizes it. You automatically relax in a way that you will not with any other motion. Everyone has this “ah-ha” experience on The Floating Bed. Fortunately, you don’t have to understand why; you feel it, and just instantly, deeply, relax.

Jay Leno Show, NBC TV

Porch & Guest bed with Memory Foam

“It was like being rocked to sleep in the arms of God.”

- A.L., hotel guest, on TripAdvisor

So what’s the bad news?

You have to purchase one, install it, and it takes some space. After that, it’s all good news. You sleep better every night, & get health benefits for the rest of your life, at no more cost.

Users love it. This is not all just theory. Owners say it’s one of the best purchases they ever made. They say it feels great, & they fall asleep faster, deeper, have better sleep, and better dreams. They awake feeling more refreshed, with less stiffness and other negative residual effects from sleep and immobility. They are finding improvements in overall health.

Floating Beds have appeared on many TV shows: Jay Leno, Extreme Makeover Home Edition, American Inventor, HGTV. It is featured as the “Bed of the Future” at Disney World Resort[®] Innoventions at Epcot[®]. They are enjoyed by many people in their homes, at hotels, & health spas worldwide.

Where can I put it?

The bedroom is a great choice. Otherwise there are many ways to enjoy a Floating Bed, if you can’t dedicate a bedroom, or every night to it. They are surprisingly practical. People put them indoors or out, in the living room, porch, den, deck, as a sofa, an occasional bed, guest bed, or nap bed. Even a five minute rest on a Floating Bed makes you feel much better, since your circulation continues. In contrast, if you try a five minute nap on your old-fashioned bed, you often feel groggy, or worse.

Other questions?

Memory Foam? That is the only reason many other companies claim their beds are better. We have it too. Yet Memory Foam is just one in the list of great reasons to have a Floating Bed.

Installation uncertainty or questions? Yes, we can help with that too. And ask about our guarantee. We can tell you more about other benefits, the unique construction, and how the details work together to provide the best sleeping experience. Learn more by visiting www.floatingbed.com or call: 888 528 6031.

Your Deck can be a Bedroom too

Frequently Asked Questions:

Where can I put it? In the bedroom for better sleep, the living room (as a sofa or daybed), as a guest bed anywhere (hoist it up out of the way), or the yard, deck or porch.

Will it last? Yes. The best quality materials & construction are used throughout: stainless steel, nautical rope, Sunbrella. OK outdoors, & built to last a lifetime.

Can my ceiling hold it? Yes, after installation your ceiling will be stronger. Typically takes 8 -16 hrs for a carpenter to install. We also have indoor & outdoor stands, for your deck, or for portable use.

How strong is it? 1000 lb rating, for 5 adults (or many children). It's the best party mixer ever.

Will the motion bother me? No. It's gentle, very peaceful, like a boat anchored in a still harbor. In fact, after a few nights, the question we sometimes get is, "How can I make it rock more?" - J.A. (However, if you really want to limit the motion, or use it in a small room, it can easily be tethered.) This gentle motion cures insomnia, & cures motion sickness (Vestibular Therapy). A user explains - "... I received an unexpected side benefit. Sleeping in it for 2 weeks cured my long-term motion sickness, even though at first I was afraid to even get in it, because my sensitivity was so acute." -Pati S.

What do I need to get? Standard package- Queen Floating Bed, w/Memory Foam, for indoor use. Other accessories include stands, sunshades, rain covers, tent, "sofa" pillows, other sizes, etc.

Call now for more details. We will be glad to answer all your questions on the phone. We can also guide you & your carpenter through installation, and our advice is free. Installers are available too.

"... The finishing touch on this magical place however, was the Floating Bed. It was like being rocked to sleep in the arms of God."

- Testimonial from A.L, guest at the Secret Garden Hotel, Ojai, CA, on-line review.

Enjoy the other third of your life!

More Testimonials

“So what is your favorite part of your home makeover?” - *Senator Diane Feinstein.*

“My Floating Bed!” - *5 year old Ashley (on ABC’s Extreme Makover, Home Edition).*

“My deck is now the most popular room in my home. I thought I was just buying a great bed, but I got a sofa, babysitting device, and created a guest bedroom too. It also helps my restless leg syndrome, and I sleep much better. What a bargain!” - *QW*

“Besides the improved rest, The Floating Bed provides something especially important to neurological development; movement. The effects of movement on the brain have been studied extensively. Some of the the benefits are diminished pain , greater mind body coordination, improved balance, and higher cognitive function.

Since the nervous system is affected directly, every thing gets better. The beauty of this is that unlike most things in life, these benefits come passively without any work. You just lie down on it, and the bed does it for you. Sleeping in it, people achieve deeper restfulness than with stationary beds.

Aside from all the technical information, did I mention how much fun it is ...”

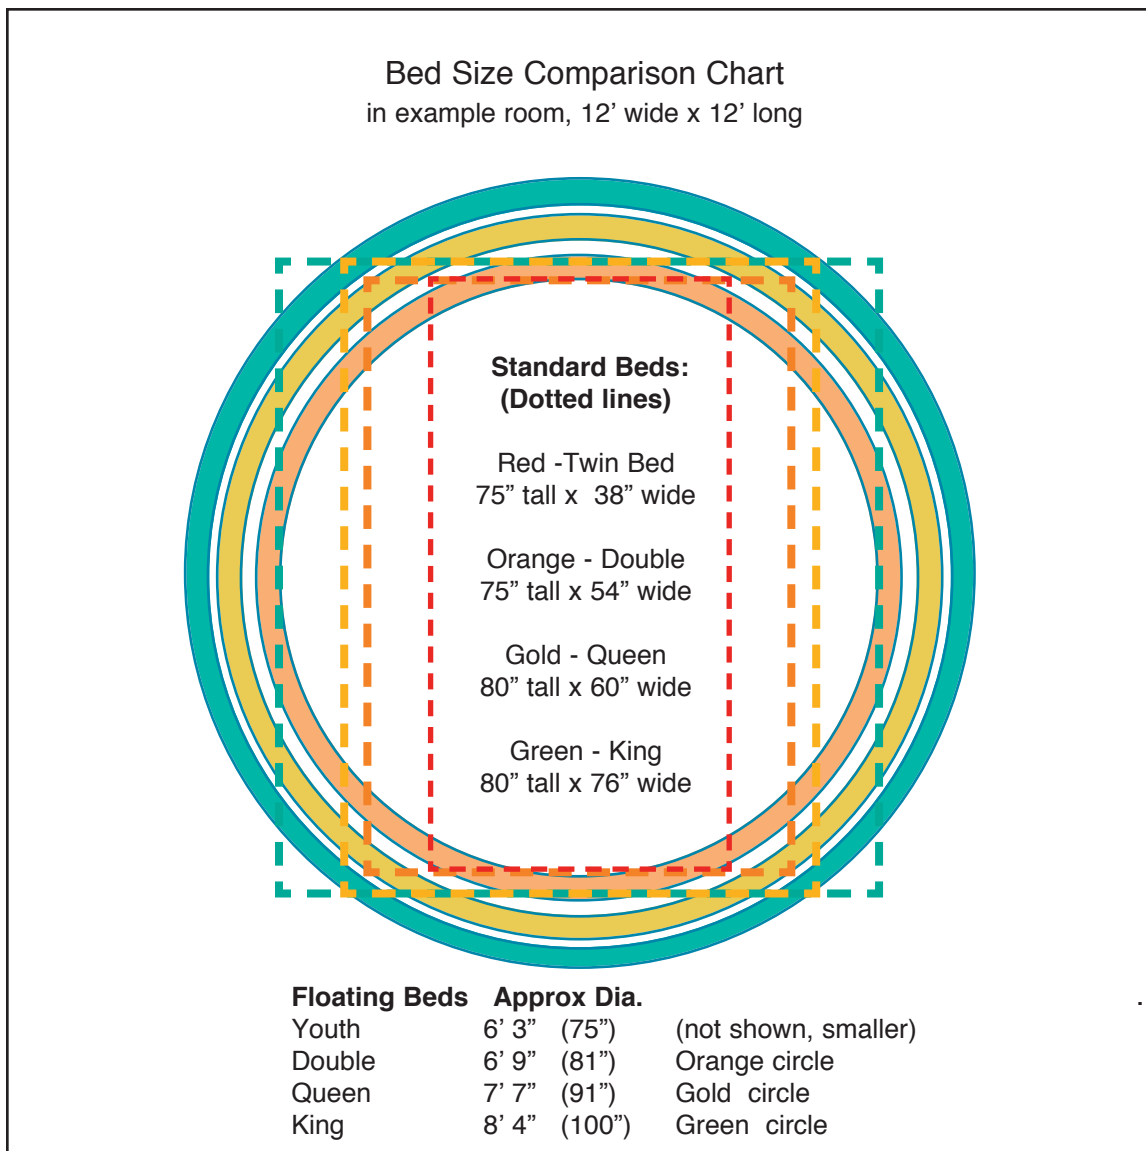

- *Dr. Jonathan Racherbaumer*

“What an amazing new way to sleep and relax”

- *Mike Love, The Beach Boys*

This is really nice, and relaxing, I gotta be honest.”

- *Steve Schirripa, on the Jay Leno Show*
