FULL BODY VIBRATIONAL RESONANCE TECHNOLOGY

The VIBE System is the most advanced bioresonance technology on the market today.

Bioresonance Technology accesses a direct connection into human neurology & physiology through the biggest sensory organ of the body- the skin.

This access point receives the largest range of sensory information than any other sensory organ in the body. This mechanism provides deep quick levels of meditation, relaxation, and cellular memory release.

The V.I.B.E. 3.1

Our FULL immersion system featuring 4 vibrational center points, anti-gravity ergonomic shape to support the spine for the deepest state of relaxation and comfort. Perfect for clinics, holistic centers, corporate wellness rooms, home office, & video gaming.

The V.I.B.E. 3.2

Designed to be light weight, travel friendly, and low profile. Created for practitioners to add a vibrational component to their bodywork, massage therapy, sports recovery, chiropractic, acupuncture, naturopathic practice, etc. It's the best way to upgrade any experience.

BIOHARMONIC TECHNOLOGIES

Music and multi sensory experiences that transform, restore, balance, release, detoxify, relax, and activates physiology in a variety of different ways.

It is our mission to raise the vibration of the planet and harmonize humanity using sound frequency, light, and vibration.
