

## Extended Diffuser Fins - MK7 GTI Installation Instructions

### NOVUSTECH:

[@novustech](#)

[@novustechspacers](#)

Kitchener, Ontario, Canada

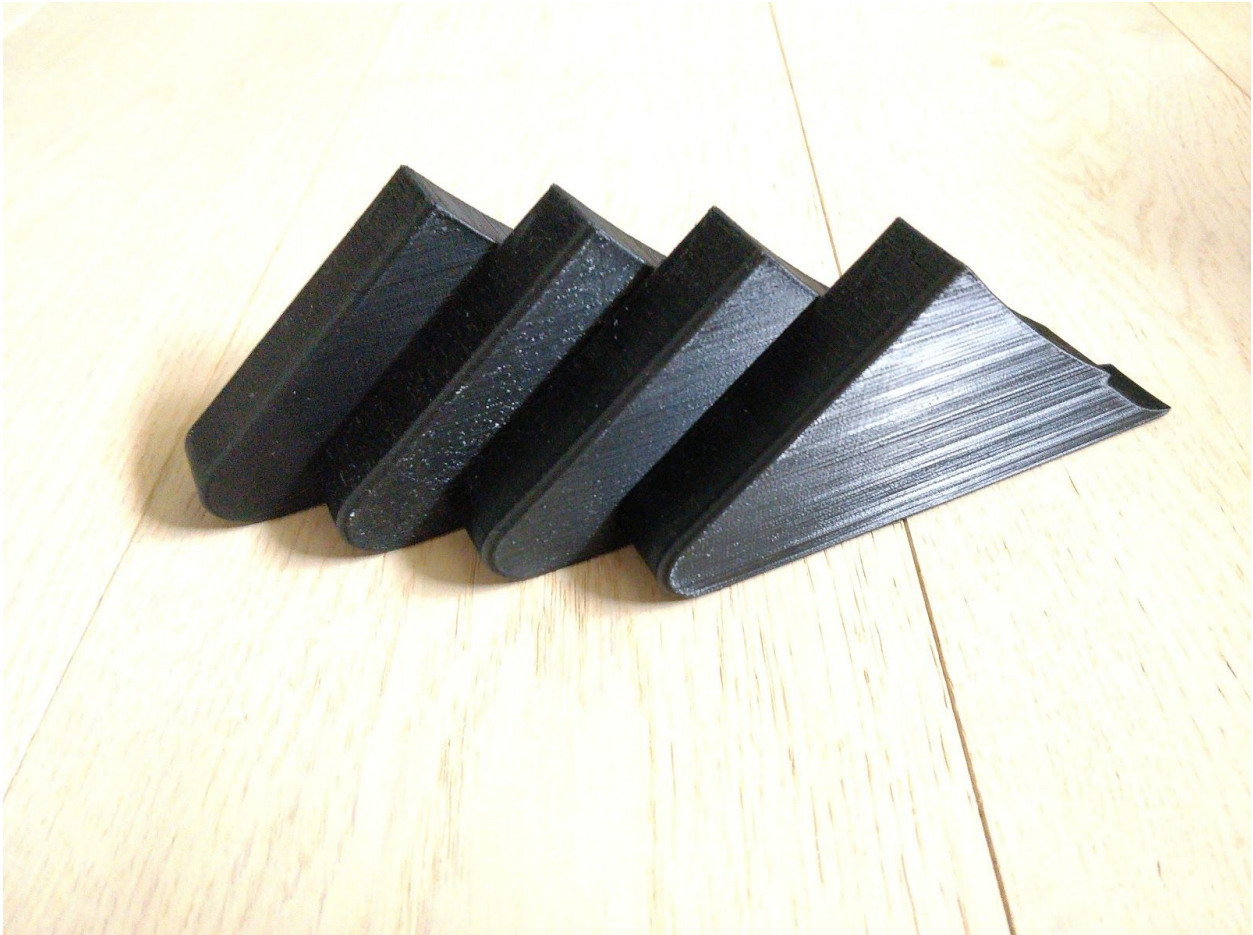

### Time:

- 5-10 minutes

### Tools required:

- Power drill with #2 phillips bit

## WHAT IS INCLUDED:

NOTE: Mounting screws are also included but not shown

## Instructions:

1. Determine spacing of fins:
  - a. Start with outer fins that fit over the last column of hexagons at each end
  - b. Then count 4 columns and place inner fins on the 5th column as shown in the image below

2. Place the first fin (outer) as shown in the picture below. Ensure that the step on the fin is pressed against the lower edge of the honeycomb grill edge.

3. Insert one of the provided self tapping screws into the fin hole at the bottom and use a drill to mount the fin. NOTE: be careful to not overtighten and strip the hole.
4. Repeat for remaining fins

NOTE: alternative to Step 2, you can drill a pilot hole with a 1/16" (1.5mm) drill and then use a screwdriver by hand to mount each fin

## Materials

- Diffuser Fins are 3D Printed out of ABS Plastic
- Hardware is made of 304L SS
