

# how to

## fruit and vegetable foam markers

### You will need...

- Assorted foam sheets
- Lollipop sticks
- Glue
- Marker pen
- Scissors
- Coloured paints
- Paintbrushes

1. Cut the coloured foam sheet into the shape of the vegetable, fruit or flower you intent to plant.
2. Paint the lollipop sticks to match the colour with the cut-out shapes.
3. Glue the cut-out shapes onto the lollipop sticks to create labels for your garden crops.
4. Pop them in the ground or plant pot next to the seeds you've planted and watch them spring to life day by day.

We have also created handy fruit and vegetable templates that you can print out to use as either an outline for cutting out the foam shapes or simply use these and colour them in.
