

Our absorbents are color-coded, so you can quickly choose the spill control product that best fits your liquid spill or containment needs.

Why are Absorbent Spill Control Products Color-Coded ?

Soak up your spill with our superior brand of absorbents

 ur absorbents are color-coded, so you can quickly choose the spill control product that best fits your liquid spill or containment needs.

The quality and engineering that go into manufacturing our spill control products are the very best in the industry. Nothing on the market outperforms or outlasts our inventory selection. We are constantly sourcing from new and current suppliers to provide the very latest in absorbing technology. Our partnerships with the largest and most-respected manufacturers allow us to provide a comprehensive offering for all of your spill control needs.

Mednik Riverbend Absorbents: The very finest selection and the most competitive price!

When spill control products were created over three decades ago, they were cheap, flimsy and fell apart when used. Kitty litter was considered state-of-the-art....It's amazing how far we have come. Today, our Mednik Riverbend offering is a result of partnerships with the leading manufacturers in the industry.

Choose the spill control product that fits your liquid needs

Our color-coded absorbents make it easy for your employees to choose the appropriate mat, boom, sock, pad, or pillow for whatever type of liquid or solvent they are trying to clean up. Not only that, the color coding actually saves you money. By using the right absorbent for the right spill or leak, you don't spend money on products that are not specifically designed for the spill at hand.

Gray: Universal

Also called “MRO” absorbents, these products soak up the widest range of liquids, such as oils, coolants, water, and solvents. The gray color is easy for your employee to

apply the right tool for the right spill cleanup.

Common liquids absorbed include: motor oil, hydraulic oil, vegetable oil, antifreeze, gasoline, diesel fuel, MEK, xylene, acetone, water-based solvents, and toluene.

White: Oil-Only

Mednik Riverbend Oil Only Absorbents repel water, so you can clean up oil-based spills or solvents, even in exterior situations such as marine or outside ground

applications. In situations where oil-based liquids are the culprit, the white designated products are easy to spot in your clean-up arsenal. The ability of these absorbents are well-documented and lower in cost when compared to using the wrong item for your clean up. Do the clean up the fastest way possible with the product designed specifically for your needs. Oil-only products float on top of water for quick and easy marine spill cleanup. It’s designed to absorb only the oil or fuel and not pick up the water.

Common liquids absorbed include: motor oil, hydraulic oil, cutting oil, diesel fuel, gasoline, synthetic oil, vehicle fluid, or vegetable oil.

Yellow: Hazmat

Our Hazmat Absorbents are specially manufactured and chemically treated to absorb acids and caustic chemicals without reacting or falling apart when you need them

the most. Hazmat spill control products can be used in labs, manufacturing and as packaging material when shipping chemicals.

Common liquids absorbed include: Sulfuric acid, hydrochloric acid, nitric acid, hydrofluoric acid, phosphoric acid, sodium hydroxide, potassium hydroxide, and hydrogen peroxide.

Be Prepared. Contact Mednik Riverbend.

Be prepared with the right absorbent for the right clean up. Most best practice businesses do a thorough inventory of their needs based on the types of fluids used in their facility. Stocking a small variety of these color-coded absorbents, along with staff training, will allow you to be prepared when the time arises. **COLOR-CODED ABSORBENTS MAKE IT EASY.**
