

# Custom Engineered Dry Wipe Disinfecting Program

- **Manufactured to custom specifications**
- **Recommendations based on science and engineering**
- **Product development**
- **Quality assurance**
- **100% polypropylene substrate**
- **Thorough interview process that yields best results**
- **Commercial mill best-practices**
- **High volume welcomed**

## We create custom solutions for your pre-saturated wiping needs.

Whether you're manufacturing a chemical hand sanitizer and are interested in producing your own line of hand sanitizing wipes or looking for a dry refill for an existing canister or bucket container, we can assist in the production of interior substrate refills. We provide the wipes. You provide the solution.

Our mills can suggest the **right substrate** for the particular solution utilized. Lead times depend on quantities, from cases numbered in the hundreds to multiple truckloads. We work hand in hand with our sources throughout the process to produce the exact roll that meets your expectations. We utilize several cutting methods, winding techniques and folding methods which allow us to meet your most demanding converting requirements. In addition to several converting techniques, we also offer custom converting services. We can offer you a turn-key product giving you a **perfect finished product**.

Mednik Riverbend is a leader in the production and distribution of customized disinfecting components for large scale applications. Call us at **1-800-325-7193** and let us know what you need. Our team will help you create a custom solution that can meet your individual needs.

**“Our constant needs for disinfectant wipes during the pandemic has left us a void. Mednik Riverbend was able to provide exactly what we needed to provide an economical refill.”**
