100%
COMMITTED TO A
SUSTAINABLE
FUTURE

Jiffy Roll Wipes are our thickest, most absorbent wipe, ideal for demanding aerospace work.

MEDNIK RIVERBEND'S WIPES have been engineered and manufactured to meet the aerospace industry's stringent requirements. With products strong enough to withstand industrial wiping and polishing operations using solvents, we are known for quality, strength, and innovation—plus affordability even for the tightest budget! They are part of our key **PRECISION PERFORMANCE LINE** offering that satisfies the most critical wiping needs.

JIFFY ROLL WIPES are made from four layers of 100% cotton cheesecloth and contain no contaminants, silicone, or chemical binders. They provide a heavier, thicker, more absorbent wipe than **HERMITEX®**, and they are excellent for use in sealant applications. Whether you purchase by the individual roll, or by the case or pallet, we stock an ample inventory to meet or exceed your needs.

In the hypercritical aerospace manufacturing environment, there is no room for second chances. You can rely on Mednik Riverbend's products and services to provide the quality and reliability that your manufacturing processes demands.

PACKAGING OPTIONS:

128 pre-cut pieces per roll / 9" x 24" pieces.
10 rolls per case.

MednikRiverbend

YOUR VISION. OUR GOAL.

High Quality Wiping and Absorbing Products and Services

For years, companies have chosen to partner with Mednik Riverbend. Our proven experience can help you increase profits, capture market share and set yourself apart from your competition.

Find out what we can do for you.
