# Exercise Is For Everyone

## Making a Difference

### Physical Activity

We want to help people who can not use a regular exercise bike, because of their disability, muscular dystrophy or old age.

We want to enable individuals with a neurological disease, to be able to train cognitive functions and strengthen their movement giving them a lifechanging experience.

Our Combi Bike Plus gives the user the ability to exercise safely on their own, or with a therapist. The vast effect it has on mobility makes it the optimal choice for professionals.

## About Us

### We Are Lemco

Lemco Mobility is a Danish company with an eye for individual needs, since 1983.

We have created the perfect mobility exerciser for people with physical disabilities and neurological diseases.

Our purpose is to improve the everyday life of people with disabilities world-wide.

✓ Neuro ✓ Care ✓ Rehab ✓ Sclerosis

# World-Class Technology

## Unique Experience

### Beat Technology

The BEAT Technology is a unique feature of the Combi Bike Plus. Our mobility exercisers with BEAT Technology, makes the motion feel smooth, and ensures it is possible for people even with severe disabilities to exercise with ease.

It gives those who have experienced no progress in stamina using motor assisted trainers, an opportunity to regain their strength and mobility.

The exerciser is designed so it is able, to be used unassisted.

## Our Passion

### #1 Choice For Rehabilitation

People all over the world choose our exerciser in favor of all other available options, for rehabilitation of stroke, parkinsons, MS, injuries - when they have tried the combi bike plus.

Our exercisers are used in Hospitals, physiotherapies, nursing homes, activity centres, and at home, etc.

Our mobility Exercisers are >99% Recyclable.

< 10 Seconds Learning Curve

# Experts in mobility exercisers

## User Comments

### Undeniably the best!

**No one gets worse. Everyone gets better.**

**"Your exercisers are undeniably the best we have bought in the last ten years (And we have tried many) we have 13 exercisers currently."**

*Stroke Rehabilitation center. Denmark*

### Perfect Design!

**It invites to move.**

**"Its ergonomic and affordable. The resistance gearing is easily operated by the user and therapist."**

*Physiotherapist. Denmark*

### They love it!

**Everyone can use them.**

**"Its easy to operate for Walker or Wheelchair users.**

**Its a safe way to exercise.**

**Our elderly love it."**

*Occupational Therapist. Denmark*

### 5 More please!

**It's exciting with something new.**

**"We have 70 residents at our nursery home. But only 5 exercisers, We would like 5 more! They work absolutely phenomenally."**

*Physiotherapist. Denmark*

### Its genius!

**I love this exerciser.**

**"It has such a fluent motion, its easy to place your feet and I can exercise my arms at the same time."**

*Catherine (MS). Switzerland*
