Decubitus therapy mattresses with evacuation function

- Your **all-in-one** solution -

In case of fire you have only **3 minutes** to escape!

All EVAQ® decubitus therapy systems are equipped with an evacuation function.
Patients can be evacuated by a single person in case of fire.

It takes **less than 60 seconds** to evacuate one person from one floor to the other.

Watch our evacuation film and see for yourself.

Resource saving (money and workforce)!

Decubitus therapy mattresses with evacuation function

All mattresses in this range are equipped with an evacuation function. This means that you can evacuate patients quickly and easily without transferring them on rescue sheets or carry them on stretchers!

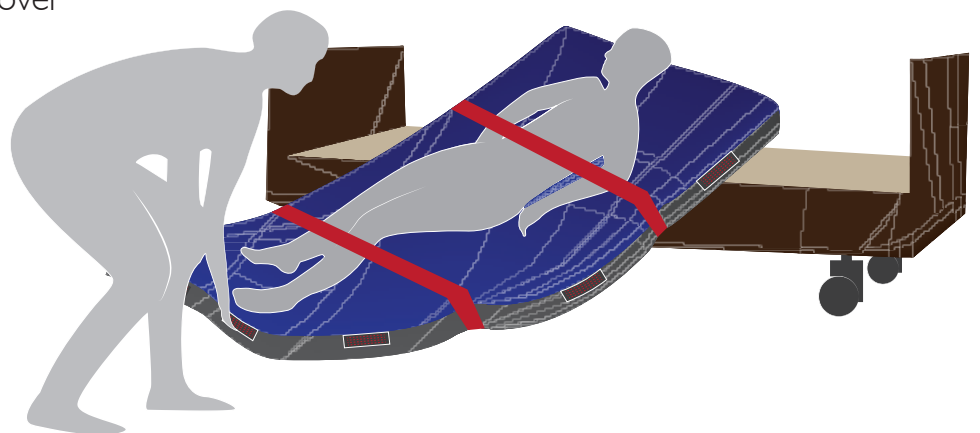

Evacuation systems such as stretchers and rescue sheets often require 2 or more persons to use them.

The EVAQ® decubitus therapy mattresses enable you to carry out evacuation gently using only one person, even via stairs!

§§ Quite apart from the fact that every facility operator is responsible for taking measures to ensure rapid evacuation! §§

SAFER → FASTER → GENTLER

- Safety belts with quick-release buckle
- Special sliding material at the bottom
- Stairway evacuation possible
- Firm edges provide stability
- Rescue handles on the cover
