

## C7 1149114M MODIFICATIONS

The hood duct and fan shroud must be modified to allow for our HP (70mm) core installation. The following five (5) images illustrate the trimming required.

Note: Only the bottom 2/3 of the hood duct is going to be cut back 1/2". Cut through front face 1/2" deep only.

Cut 1/2" off from this point to opposite side.

Fig. 2

Sharpe offers a silver color marker that helps when working with dark items.

Fig. 3

Finish cut along the bottom. You will cut through the foam seal on the bottom. Try to keep the remaining seal intact.
