## APOLLO VERTICAL POST 36 / 90 in

- These sturdy yet elegant vertical uprights are the backbone of the Apollo System. Central post is 0.75 x 1.5 in thick. At least two posts are required to support a system. The system can expand by adding posts and components between them. Components can adjust up and down on the uprights. Some limitations apply. Adjustable feet allow to compensate for uneven floors. Upper plates are designed for secure mounting to the walls.

- The system is highly versatile and customizable; use our online builder or talk to our consultants if you have space limitations.

- Two heights are available, 90 and 36 in. They can be combined in any order.

- Clear finish for indoor use only.

- Hand made in Central Java, Indonesia.

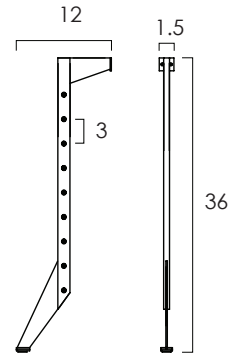

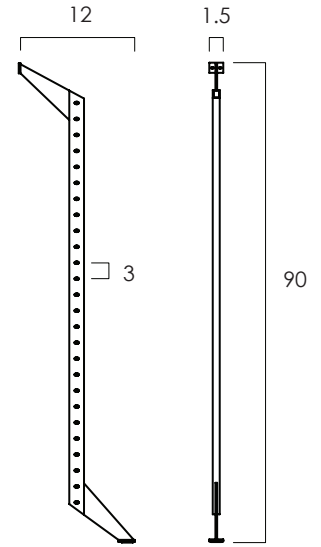

PLATE WIDTH: 1.5 in  
POST WIDTH: 0.75 in  
DEPTH: 12 in  
HEIGHT: 90 / 36 in

2022 Finishes:

- Clear Iron Powder Coat (RC)
