

ANGLED BRACKET

- Angled iron brackets is a type of hardware for Apollo System to support shelving at an angle which allows to use it as a display or as shoe storage. The brackets allow to adjust height of components in increments of three inches. Each shelf requires one pair (left and right bracket). Brackets come with screws.
- Clear finish for indoor use.
- These brackets are specialty hardware for our Apollo Modular System and won't work for other applications.
- Hand made in Central Java, Indonesia.

WIDTH: 1.5 in DEPTH: 7.5 in HEIGHT: 6 in
