

TEAK STUMP WITH ROPE WEBBING

- Webbed stumps were inspired by the shape created by nature itself. Handcrafted from clear finished Teak wood, these hollow stumps feature a gray woven seat for added comfort. They are uniquely individual from one another yet are similar in shape and uniform in height. Due to product's natural variations dimensions are approximate.
- Suitable for outdoor use.
- All wood is sustainably sourced from local plantations. Hand made in Central Java, Indonesia.

DIAMETER: 10 - 16 in

HEIGHT: 16 in
