

AutoSync

Compatible with all 2007-2014 GMT-900 truck/SUV's

Features:

- Tire pressure monitoring system (TPMS) disable (NOTE: this is illegal to use on public road-going vehicles, it must ONLY be used on offroad/race vehicles).
- Brake light strobe (rapidly strobes brake lights 3 times before illuminating solid to increase visibility and awareness, similar to emergency vehicles).
- Automatically activate backup camera when turn signal is selected, to give enhanced view of blind spots and area behind truck (2012-2014 with factory navigation only).
- Control of EFILive DSP switchable tuning or EZ-Lynk SOTF tuning via tapshift buttons and Driver Info Center (DIC) display.
- Reprogram TPMS "low pressure" warning threshold pressure for non-factory tires.
- Manual high-idle control (great for warming up vehicles in cold, or to increase engine RPM while jump-starting other vehicles).
- Automatic notification to alert the driver when Diesel Particulate Filter (DPF) regeneration process is active.
- Open/close windows while vehicle is off using factory keyless entry remote.***
- Fold/unfold power-fold mirrors while vehicle is off using factory keyless entry remote.***
- Enhanced bed/cargo light feature that turns on both the bed light and reverse lights simultaneously for extra illumination of the rear of the vehicle. Controlled separately from dome light control, unlike factory.
- Exterior lighting strobe/flasher feature. Rapidly flashes front turn signals, rear turn signals, reverse lights, and headlights in an alternating pattern.
- Easily self-learn new keyless entry remotes. (previously, this required a dealer visit on 2010+ vehicles)
- Manually activate backup camera display at any time while driving to check on trailer/cargo/etc (2012-2014 factory nav vehicles only).
- Automatic torque converter lockup controller for racing/sled-pulling applications.
- Stereo bass boost (slightly increase maximum bass/subwoofer output, Denali only).
- Enhanced engine/transmission data display to show actual engine coolant temp, actual engine oil pressure, turbocharger boost pressure, exhaust gas temperature, current transmission gear, and torque converter lockup status data in the Driver Info Center.***
- Add "one-touch-up" window control to driver's front window.***
- Add "one-touch-down" window control to both rear windows.***

*** = feature only available on SUV's, SLT/LTZ/Denali pickup trucks, and SLE/LT pickup trucks WITH factory power-fold mirrors and RPO code "DL3" listed on the glovebox sticker. Not available on base/SLE/LT trucks WITHOUT "DL3" RPO code.
