#### Data Sheet | MS510TXM, MS510TXUP

#### 8-Port Multi-Gigabit/10G Ethernet Smart Switch with 2 SFP+ Ports

# Elevate your business above the 1Gb barrier

As a leading provider of network equipment for SMBs, NETGEAR® understands the importance of providing a great choice of speed and power that can support the business's needs to keep up with the growth of network speed, virtualization, cloud-based services and applications like VoIP, video streaming and IP surveillance, whether in the hospitality, catering, education or retail domains. Also, the increase in speeds for WiFi 6 Access Points now imply the need for faster speeds in the network.

The MS510TXM and MS510TXUP 8-Port Multi-gig/10G switches with 2 SFP+ Ports join the NETGEAR Standalone Smart Switches family, adding

multi-gigabit/10G speed, a high PoE budget for all PoE/PoE+ devices, and Ultra60 PoE++ support (295W total PoE budget for MS510TXUP) for deploying devices with multi-gig capabilities and speed, such as WiFi 6 Access Points (eg. WAX610 from NETGEAR), multi-gig or 10G NAS.

NETGEAR Smart Switches offer powerful Layer 2+/Lite L3 features, great PoE functionality, and enhanced performance and usability. They are purposely designed for modern applications and support BYOD which requires companies to have more bandwidth to ensure smooth network connectivity with no congestion.

Furthermore, in 2.5G or 5G speeds, there is no requirement to upgrade your cabling from Cat5E, allowing for savings in installation costs.

To empower the Wireless and PoE applications, NETGEAR Insight Remote/ Cloud Management is added to these two new switch models as an optional management mode. By activating the NETGEAR Insight Cloud management, the users will enable management features allowing businesses simpler configuration and deployment from anywhere using the NETGEAR Insight app from mobile devices or the Insight Cloud Portal from any device with a web browser.

## Highlights

Temperature- and load-based fan-speed control combines accurate monitoring with minimized system acoustic noise, ideal for office enviornment. The MS510TXM and MS510TXUP support quiet rack mounting operation with a maximum of 25dB (MS510TXM) and 33 dBA (MS510TXUP) even at full power and 25°C (77°F) ambient.

# More Powerful Switch with Multi-gigabit/10G Speed

- 4 x 1G/2.5G ports and 4 x multigig/10G ports
- 8 x Ultra60 PoE++ ports with 295W PoE budget (MS510TXUP only)
- 2 dedicated 10G SFP+ fiber uplink ports

# Fast and flexible solution for SMB data, voice and video converged network

- Non-blocking switching with 140Gbps bandwidth
- Flexible rack-mounting option

#### Highlights

# Ideal companion to your NETGEAR WAX610

- Connect and power your WAX610 with MS510TXUP
- Connect your WAX610PA with MS510TXM
- Manage all devices from a single dashboard with NETGEAR Insight

#### **Powerful Connectivity and Security**

- Advanced VLAN support for better network segmentation
- L2/L3/L4 access control lists (ACLs) for granular network access control including 802.1x port authentication
- Advanced per port PoE controls for remote power management of PoE powered devices including operation scheduling
- Advanced QoS (Quality of Service) for traffic prioritization including portbased, 802.1p and L2/L3/L4 DSCPbased

- Auto "denial-of-service" (DoS) prevention
- IGMP Snooping and Querier for multicast optimization
- Egress Rate limiting and priority queuing for better bandwidth allocation
- Port mirroring for network monitoring
- Energy Efficient Ethernet (IEEE 802.3az) for maximum power savings
- IPv6 management: IPv6 QoS, IPv6 ACL, IPv6 Multicast, and static and dynamic IPv6 address assignment
- Cable test to troubleshoot connection issues
- Easy-to-use Web browser-based management GUI available in English, German and Japanese
- SNMP v1, v2c, v3 and RMON remote monitoring

# Fully-integrated cloud-manageable devices

 Optional NETGEAR Insight Remote/ Cloud Management on both switch models. Easily activated through the local device GUI.

#### Smart IT, not Big IT

- Easy to manage via web-based
   Management interface or Smart Control
   Center on Windows PC for multi-switch deployment
- NETGEAR Switch Discovery Tool (NSDT) to discover, register and access to the local browser interface to configure the switches

#### **NETGEAR Quality and Reliability**

 Worry-free Limited Lifetime Warranty\*, online technical chat support and Next Business Day (NBD) replacement.

MS510TXUP	2 MB	256MB RAM 64MB SPI FLASH	(ingress)	256 VLANs	line-rate	10G Copper: <2.420µsec 10G Fiber: < 1.257µsec	256

### Features and Benefits

Hardware Features	
Fully-integrated Cloud-manageable Devices	Require no additional hardware (cloud keys, network portals, local servers, VPN or proxy appliances etc) to directly connect to the cloud and allow remote management. No additional hardware or software. Just switch to Insight Cloud Management mode through Web browser-based User Interface and go.
Multi-gig/10G 1000BASE-T Copper Ethernet and Ultra 60 PoE++ connections	Support high-density VoIP, Surveillance and Wi-Fi AP deployments, scalable for future growth. Never face the risk of running out of PoE ports.
10G 1000BASE-X SFP ports	Two dedicated 10 Gigabit SFP+ ports for aggregation to the network core. Support for Fiber and Copper modules.
Low Acoustics	Temperature- and load-based fan-speed control allow for quiet operation in both desktop or rack mount configuration.
Energy Efficient Ethernet (IEEE 802.3az)	Maximum power reduction for ongoing operation cost savings.
Desktop and rack-mount (kit available)	Flexible deployment on desktop and also support rackmount.
Ideal companion to your NETGEAR WAX610	<ul> <li>Connect and power your WAX610 with MS510TXUP</li> <li>Connect your WAX610PA with MS510TXM</li> <li>Manage all devices from a single dashboard with NETGEAR Insight</li> </ul>
Software Features	
Remote setup, management, and monitoring anywhere, anytime, from your mobile device, PC, Mac, or tablet	Locally or remotely setup, configure, manage, monitor or even trouble-shoot your network from anywhere, anytime. Check network status, view dashboards for network health and activity, power cycle PoE ports, etc, and update firmware remotely. No need to be on-site, open up ports to your network, or VPN into it.
Auto-join and Configure (Zero-Touch Provisioning)	Additional Insight Managed devices added to the network automatically inherit settings and configuration.
Multi-site, Multi-network Single Pane-of-Glass View	View and configure multiple networks across multiple sites, all from one single app; NETGEAR Insight.
Comprehensive IPv6 Support for Management, ACLs and QoS	Build current network with future in mind. Ensure investment protection and a smooth migration to an IPv6-based network without switch replacement.
Robust security features:  • 802.1x authentication (EAP)  • Port-based security by locked MAC	Build a secured, converged network with all types of traffic by preventing external attacks and blocking malware while allowing secure access for authorized users.
Comprehensive QoS features:  • Port-based or VLAN 802.1p-based prioritization • Layer 3-based (DSCP) prioritization • Port-based iegress rate limiting	Advanced controls for optimized network performance and better delivery of mission-critical traffic such as voice and video.
Auto-VoIP, Auto-Voice VLAN	Automatic Voice over IP prioritization (Auto-VoIP) simplifies most complex multi-vendor IP telephone deployments either based on OUI bytes (default database and user-based OUIs) in the phone source MAC address, providing the best class of service to VoIP streams (both data and signaling) over other ordinary traffic by classifying traffic, and enabling correct egress queue configuration.

### $\mathsf{Data}\,\mathsf{Sheet}\,|\,\mathbf{MS510TXM},\mathbf{MS510TXUP}$

Software Features (continued)	
Auto-WiFi, Auto-Camera VLAN	Auto-WiFi VLAN and Auto-Camera VLAN allows the switch to forward packets with the inputed OUIs of Wireless APs and cameras in a special VLAN with priority settings of that VLAN automatically.
IGMP Snooping	Facilitate fast receiver joins and leaves for multicast streams. Save cost and improve network efficiency by ensuring multicast traffic only reaches designated receivers without the need of an extra multicast router.
Protected Ports	Ensure no exchange of unicast, broadcast, or multicast traffic between the protected ports on the switch, thereby improving the security of your converged network. This allows your sensitive phone phone conversations to stay private and your surveillance video clips can be forwarded to their designated storage device without leakage or alteration.
DHCP Snooping	Ensure IP address allocation integrity by only allowing DHCP messages from trusted DHCP servers and dropping malformed DHCP messages with a port or MAC address mismatch.
Dynamic VLAN Assignment (RADIUS)	IP phones and PCs can authenticate on the same port but under different VLAN assignment policies. Users are free to move around and enjoy the same level of network access regardless of their physical location on the network.
Link Aggregation (LACP)	Build up bigger bandwidth to support aggregated uplink/downlink traffic or to provide redundant link(s). Aggregate up to 8 ports for 8Gbps connections.
Loop Prevention and Auto-DoS Prevention	Detect and prevent (auto port shutdown) accidental network loops and protect against DoS attacks.
PoE Timer and Scheduling	Allows IT administrators to increase network security, better utilize network resources and conserve energy by scheduling or remotely controlling on/off of PoE ports.
Port Mirroring and Cable Test	Many-to-one port mirroring for better and quicker network diagnostics and troubleshooting. Cable test easily identifies bad Ethernet cables.
Dual Firmware Images	Dual firmware images for transparent firmware updates with minimum service interruption.
Firmware Updates from Cloud	Direct cloud-to-device firmware updates, initiated and/or scheduled using the Insight app, all from the palm of your hand, anytime, anywhere!

# Simply Activate NETGEAR Insight Cloud Management to manage your network. Anytime. Anywhere.

By activating the NETGEAR Insight Cloud management, the users will enable fundamental management features allowing businesses simpler configuration and deployment from anywhere using the NETGEAR Insight app from mobile devices or the Insight Cloud Portal from any device with a web browser.

Unique advanced management features of these Insight Managed devices include:

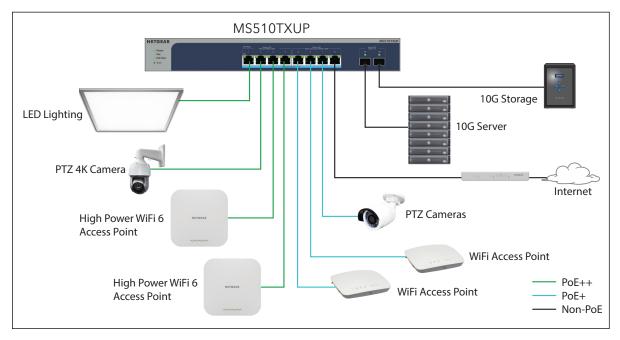

- Remote monitoring and management with performance dashboards and troubleshooting features including remote
  reboot, port and PoE advanced configuration including remote enable/disable/power-cycle, PoE scheduling, and
  firmware updates with auto-schedule mode
- Single pane-of-glass multi-device, multi-network, and multi-site remote monitoring and notifications with the NETGEAR Insight app
- Full-fledged local or remote access for configuration, management, and monitoring on a larger display using your tablet, laptop, or desktop computer through the NETGEAR Insight Cloud Portal
- Configurable in-app and email alerts and notifications
- Auto-join and configure (zero-touch provisioning) for additional Insight Managed devices added to the network
- Centralized network configuration (policies) across Insight Managed Switches, Access Points, and ReadyNAS storage for VLANs, ACLs, QoS, LAGs, etc.
- Cloud-based network administration, monitoring, and firmware management

For more information about NETGEAR Insight-manageable device settings, please see at: https://www.netgear.com/support/product/Insight.aspx
