AIRkeeper app for Atlas Copco G series compressors

AIR keeper
Atlas Copco

Keep your G series compressor always at hand

Optimizing your production just became a lot easier. The new AIRkeeper app allows you to monitor your Atlas Copco G series compressor remotely. Anytime, anywhere. Using your phone or tablet's Bluetooth connection, you can even control the unit to turn it on/off or improve its efficiency. You can also run a leakage detection program to ensure your compressor is working optimally.

AIRkeeper keeps a constant eye on your compressor for you with real-time notifications when your compressor needs attention. It's peace of mind and productivity built into one easy-to-use app.

Download AIRkeeper now from your app store. Installation only takes seconds!

Performance and efficiency at your fingertips

- Monitor your G series compressor performance status and stats.
- Remotely control your compressor.
- Unique leakage detection program.
- Real-time notifications and alerts.
- Your go-to place for support and information.

Available on the App Store

AIRkeeper app for Atlas Copco G series compressors

WIFI — Monitor performance and productivity

Use AIRkeeper to check your compressor's real-time performance indicators:

- Pressure
- Temperature
- Running hours
- Operation mode

In one quick glance, you get your compressor's key stats and weekly usage report.

Control and optimize your compressor

With AIRkeeper you can remotely control your compressor and optimize its efficiency:

- Start and stop your compressor
- Set unload and load pressure
- Select your required pressure bands to enhance performance and save energy
- Set up your week timer

AIRkeeper is available for Atlas Copco's G 7-15 and G 15L-22 compressor ranges.

Receive real-time notifications

Avoid wear and tear, not to mention unexpected breakdowns, with AIRkeeper notifications via wifi:

- Real-time machine warnings
- Real-time machine shutdowns

Get your AIRkeeper started in seconds

Setting up your AIRkeeper is as easy as 1-2-3:

1. Download the AIRkeeper app from the App Store or Google Play.
2. Scan the barcode of your Atlas Copco G series compressor.
3. Connect your G series compressor to your wifi network.

Leakage detection program

To ensure your compressor operates flawlessly, AIRkeeper offers a unique air leakage detection feature. Simply set a window of time in which you will not have any air consumption. AIRkeeper will run the program during that time and report its findings back to you.

Library of information and online support

AIRkeeper holds an entire library of instruction manuals, installation guides, videos, and much more related to your compressor. You can even find an Atlas Copco representative or a dealer through AIRkeeper.
