TECHNICAL SPECIFICATIONS

LA IMPORTANCIA DE DESAPARECER

THE IMPORTANCE OF DISAPPEARANCE

BECLARITY es la línea blanqueante que **s+ | summecosmetics** dedica a las pieles con problemas de hiperpigmentación y/o con manchas oscuras localizadas, incidiendo directamente en los responsables del proceso de la melanogénesis. Por un lado, controla la producción y síntesis de la melanina en su origen, al inhibir la actividad enzimática de la tirosinasa. Pero también, corrige la falta de uniformidad en el tono cutáneo, al disminuir la cantidad e intensidad del pigmento durante su traslado a las capas dérmicas superficiales... siendo la línea que devuelve la luminosidad deseada a la piel y la libera de sus imperfecciones.

CELL RENEWALL MULTI-ACID CELLULAR RENEWAL

Ref: 10111

DESCRIPTION

Chemical facial renewal peel, a mixture of alpha-hydroxy acids (Glycolic, Lactic, Tartaric and Citric). Improves the skin's general topography, establishing cell renewal mechanisms in the surface layers of the skin, reducing wrinkles and expression lines. Clarifying effect. Suitable for all skin types.

ACTIONS

- Keratolytic
- Exfoliating
- Rejuvenating
- Depigmenting
- Purifying

ACTIVE INGREDIENTS

GLYCOLIC ACID (Glycolic Acid): Mainly extracted from sugar cane. It penetrates deeply due its low molecular weight, working on one of the major problems of ageing, the slowing of the metabolism. Stimulates collagen production. Provides a depigmenting effect as it able to destroy the ties that bind the proteins involved in melanogenesis.

LACTIC ACID (Lactic Acid): It is extracted from dairy fermentation. It is an acid that penetrates slowly. Gets rid of dead cells, bringing brightness and strengthening the skin's hydrolipidic barrier.

CITRIC ACID (Citric Acid): It is characterised by its astringent, exfoliating and regenerative properties. Improves the size of pores by eliminating accumulated dead skin cells which cause the pores to have that dilated effect. It also preserves the balance in the surface layers of the skin.

TARTARIC ACID (Tartaric Acid): It is mainly extracted from the fermentation of grapes. It increases acidity and regulates the pH, and by doing so it acts on the bacterial activity that is found on the surface layers of the epidermis. It has a powerful lightening effect, so it is especially effective at getting rid of blemishes and acne scars.

COMPOSITION

AQUA, GLYCOLIC ACID, LACTIC ACID, CITRIC ACID, TARTARIC ACID, HYDROXYETHYLCELLULOSE, GLYCERIN, TETRASODIUM GLUTAMATE DIACETATE, CI 14720, CI 19140, BENZOPHENONE-4, SODIUM HYDROXIDE, PHENOXYETHANOL, ETHYLHEXYLGLYCERIN, PARFUM, LIMONENE, GERANIOL, LINALOOL.

DIRECTIONS FOR USE
