

## Vintage History

This is a chronology of our full library of wines with specific milestones on each vintage, beginning in 2000. Although some of our older vintages are sold out, we list wines from previous years as reference and include winemaking and tasting notes for your convenience. As you pull previous vintages from your cellar or fortuitously find one in the marketplace, please feel free to send us your notes when enjoying these aged wines. There may be Library Wines in 750ml and large format 1.5m (magnums) available through the tasting room so contact Kate to check availability at 805-736-9032 or [info@flyinggoatcellars.com](mailto:info@flyinggoatcellars.com)

### — 2018 Vintage —

The return of a normal harvest schedule. After 7 years of drought influence, harvest time seemed to creep up earlier and earlier into the year. Fortunately this year, a hot July ran into a beautifully cool August that pushed harvest back into mid-September. This cool spell allowed for a nice, slow ripening of the fruit and retention of juicy acidity.

### — 2017 Vintage —

During the growing season frost risks were minimal, but wind, rain and cooler temperatures during vines' bloom time led to shatter in some vineyards, such as Bien Nacido, which means smaller and fewer clusters per grape vine. Over Labor Day weekend daytime temperatures soared above 103 degrees in Lompoc Valley, Sta. Rita Hills AVA and Santa Maria AVA. The record-setting heat continued for days and the temperatures remained into the mid-80s overnight. While the heat forced up brix levels, the days and nights of unrelenting heat caused grapes' acidity levels to drop out fast. Flying Goat completed harvest by the first week of September and Norm is very happy with the wines in barrel.

**— 2016 Vintage —**

The lack of rain continues to be beneficial to wine quality because restricting water to the vines, either naturally or by minimizing supplemental irrigation, produces smaller berries, which have a greater skin to juice ratio. Since all the color, aromatics and much of the tannin in wine come from the grape skin, these smaller berries generally improve wine quality. First vintage of Goat Bubbles, Ampelos Vineyard, Sta. Rita Hills AVA.

**Goat Bubbles, Blanc de Blancs, Sierra Madre Vineyard, Santa Maria Valley AVA**

**— 2013 Vintage —**

This bountiful vintage with beautiful fruit provided us with over 1/3 more fruit than we expected and organically increased our case production. Flying Goat Tasting Room opened the first Bubbles Bar in Santa Barbara County in April, 2013. 2013 is the last vintage of Goat Bubbles, Blanc de Noirs, Clos Pepe Vineyard, Sta. Rita Hills AVA. Hall Winery leased the vineyard long term from the Pepe family and our Clos Pepe partnership ended.

**— 2005 Vintage —**

First vintage of Pinot Gris and Goat Bubbles, launching a new chapter in Flying Goat Cellars' wine portfolio. It's also the first vintage Salisbury Vineyard was added to the Pinot Noir program. The 2005 vintage was "almost leisurely" which gave us enough breathing room to do something we've wanted to do for years – craft a sparkling wine from Pinot Noir. There was that clone 23 at Solomon Hills just begging for bubbles. In 2005, we had the time, the inclination and the grapes, so Goat Bubbles was born! Wines produced at Presidio Winery custom crush facility in the Lompoc Wine Ghetto.

**— 2004 Vintage —**

The 2004 vintage was a crazy one. An unexpected heat spike in early September accelerated ripening, causing a flurry of activity as we harvested and processed the grapes from our four vineyards one right after the other. No rest for the weary during the harvest of '04! The wines turned out beautifully. This is our first vintage making clonal specific wines from Rio Vista Vineyards Wines: 2A and Dijon. Wines produced at Presidio Winery custom crush facility in the Lompoc Wine Ghetto.
