

MBM FAN1

Powerful fan with consistent, gentle airflow – for perfect air circulation in rooms.

- Can be placed on a table or on the floor
- Two different mounting heights available
- Three low-vibration fan blades
- Horizontal and vertical oscillation
- Touch-based control
- Four speed levels
- Timer function
- Practical remote control
- Pleasantly quiet operation
- Low energy consumption

Technical details

Power supply	100-240 V, 50/60 Hz
Fan levels	4
Horizontal oscillation	90° (left/right)
Vertical oscillation	60° (up/down)
Power	1 - 14 watts
Noise levels	30 - 55 dB
Dimensions HxWxD	20.9"/35.6"* x 12.2" x 12.2"
Weight	6.1 lbs
Cable length	5.9'

* Height without / with height extension bar

The powerful and energy-efficient fan utilizes aerodynamic principles and creates a strong yet gentle airflow to perfectly circulate the air in an entire room. Can be set to two different heights: The handy extension rod allows the fan to be converted from a desk fan to a pedestal fan in seconds. The aerodynamic design creates a powerful, consistent and yet gentle airflow that is evenly distributed in the room, even across greater distances (up to 26.2'). Three low-vibration fan blades. Vertical and horizontal axis for flexible airflow orientation: Both horizontal 90-degree oscillation and vertical 60-degree oscillation are possible. Simple operation with touch buttons or via remote control (on/off/vertical or horizontal oscillation/level 1, 2, 3, 4). To ensure safe operation, the fan blades are protected by meshed protective screens. Quiet operation: The particularly quiet fan motor enables unobtrusive operation in the background. The fan can be stopped or started with a delay of up to nine hours thanks to the timer function. Year-round flexibility: Used as a traditional fan in summer, and during winter months it can be used as a way to evenly distribute warm air in the room for a perfectly comfortable atmosphere.
