

stikwood™ care guide

Maintenance

Stikwood peel+stik planks, are made from real wood, and best practices for cleaning wood should be followed at all times.

Lightly dust the face of the Stikwood wall with a dry dust rag regularly. For high dust areas, use a hand-held vacuum with brush attachment to dust and clean the pores of the wood.

Reclaimed Wood (Unfinished Natural Patina & Reclaimed Heartwood Products)

 Our reclaimed unfinished natural patina materials should never be cleaned with a wet towel or by spraying with a chemical or high moisture spray.

- Clean spills & splashes immediately (even materials coated with Splash Safe) with a dry towel or rag, **DO NOT add additional moisture to the wood.** Adding moisture to reclaimed products can cause the material to swell or bow.

Sustainable Wood (Finished)

- Clean with a damp rag (water only) over the face of the wood.
- Sustainable and Reclaimed Heartwood that have been finished with European Oil may be cleaned with an oil soap (e.g. Murphy's oil soap) every few cleanings.

If you are not sure of your product's finish, please check out the product page at stikwood.com.
