

stikwood™ Real Wood Real Easy

Stikwood is the world's first Peel+Stik reclaimed and sustainable wood planking. Founded in 2012 with the deeply held belief that design can be both beautiful and resourceful.

Made in the USA

All Stikwood products are made in Michigan from materials sourced in the United States.

Eco-Friendly

Our ThinPlank construction weights up to 40% less per square foot, reducing your projects carbon footprint.

Commercial Performance

Our products are 100% real wood with peel+stik application, making it easy to install with little mess.

No VOCs

Our products are Indoor Advantage™ Gold—Indoor Air Quality Certified to SCS-EC10.3-2014 v4.0

Low Waste

The design of Stikwood is lightweight, making it easier to install, and produces very little waste.

Class-A Fire Treatment

We offer a Class-A fire rating coating for commercial and residential projects that need more protection.

Certifications

FSC & SCS Advantage™ Gold—Indoor Air Quality Certified, LEED opportunities available.

Specifications

Standard planks are 5 inches wide x 1/8 or 3/16 inches thick, and come in random 1–4 foot lengths. Custom lengths and widths available.

Product specification sheets available on request or at stikwood.com.
