

# QUICK START GUIDE

---

## Wireless Earbuds

Thanks for purchasing LSTN's wireless Bolt earbuds! We know you're anxious to get started, so we'll keep this short. Want this information in video form? Go to [lstnsound.co/gettingstarted](https://lstnsound.co/gettingstarted)

**1)** Hold the power (o) button down for ~5 seconds. The LED will flash red and blue, and you'll hear "Power On" when the power turns on, and a second set when the headphones begin pairing.

**2)** Open your device's Bluetooth preferences and select "LSTN-Bolt". A voice prompt will confirm the connection.

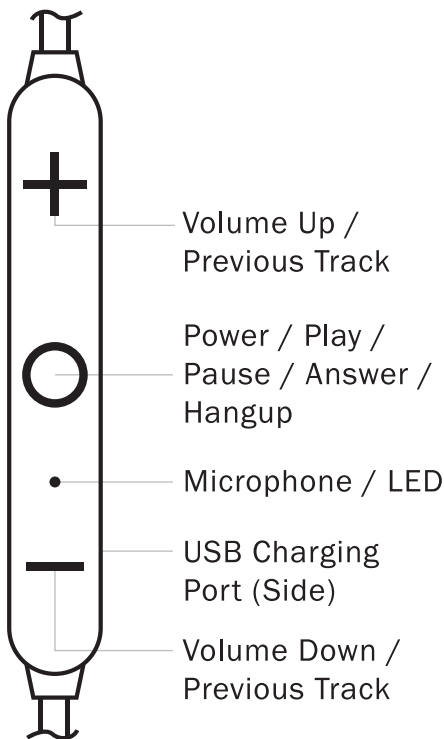

**3)** That's it! You're now connected. To pair to a different device, simply turn off the headphones by holding the power button for 3 seconds, then restart this process at step 1 with your new device.

After completing the initial pairing process, your earbuds will reconnect to the last used device once turned on - you do not need to re-pair them each time. If no device is connected within 5 minutes of pairing, the earbuds will automatically turn off.

# OPERATION

## Wireless Earbuds

Volume Up /  
Previous Track

Power / Play /  
Pause / Answer /  
Hangup

Microphone / LED

USB Charging  
Port (Side)

Volume Down /  
Previous Track

# TROUBLESHOOTING

---

## Wireless Earbuds

Something not working? Don't panic. Try these helpful tips, and if afterwards you're still stuck, contact us at [hello@lstnsound.co](mailto:hello@lstnsound.co)

### **MY EARBUDS WON'T TURN ON**

Check to ensure that your earbuds are charged. Plug the provided USB cable into a USB power supply. The LED indicator will turn red, and the headphones will begin charging. The LED will change to blue once your earbuds are fully charged (apx. 1 hour). If you're unable to get to a charger, the provided backup cable works even when there is no battery power.

### **MY EARBUDS WON'T PAIR / CONNECT**

Sometimes, connection errors happen. Try turning your device's Bluetooth connection off for a few seconds, and then try pairing again. If that doesn't work, turn off both your device's Bluetooth and the headphones for ~10 seconds, then start again.

### **MY CONNECTION IS SPOTTY / INTERMITTENT**

The Bolt's connection range is approximately 120 feet (40 m). Check the make sure you're in this range. They also work best with a direct line-of-sight connection, so make sure nothing is obstructing the path between your Troubadours and your device.

# WARRANTY

---

## Wireless Earbuds

If our product has a defect in materials or workmanship, you can return it for a full refund within one year of purchase. LSTN, at its option and to the extent permitted by law will (1) exchange the product with a functionally equivalent product that is new or equivalent to new in performance and reliability, or (2) refund the original purchase price. This warranty excludes damage resulting from abuse, accident, modifications or other causes that are not defects in materials and workmanship. You must have purchased the product from an authorized dealer in the original packaging. Please contact **warranty@LSTNsound.co** with your request if you would like to return or exchange your LSTN product in compliance with our warranty. Replacement parts are also available - to view the entire LSTN catalog please visit **www.LSTNsound.co**.

### HEARING DAMAGE WARNING

Listen carefully! Permanent hearing loss may occur if headphones are used at high volume. Set the volume to a safe level. If you experience ringing in your ears or muffled speech, stop listening and have your hearing checked. For more information on hearing loss and what to avoid, please visit **<http://www.listencarefully.org/>**
