

PAIRING

- ▶ Press and hold the center button for ~8 seconds to begin the pairing process. You will hear a prompt confirming pairing has begun. The Crescent's LED will flash red and blue to indicate it is searching for devices.
- ▶ Open your device's Bluetooth preferences and select "LSTN Crescent" You will hear a confirmation in the earbuds.
- ▶ That's it! You're now ready to enjoy your music, movies, audiobooks, and more. Your earbuds will automatically connect to the last device they were paired with the next time you turn them on.
- ▶ To pair your earbuds to a different device, simply power them off, then begin the process at step one.

TROUBLESHOOTING

- ▶ If you are having trouble connecting, try turning off both your earbuds and your playback device, then turning them back on again.
- ▶ If your connection is spotty or intermittent, you may be too far from your device. The Crescent works best within a 30-foot range of your device, with direct line-of-sight. If you keep your device in your back pocket, this can also cause a spotty or intermittent connection.
