

PARAMOUNT SOUNDBAR MOUNTING INSTRUCTIONS

Find a smooth, flat surface to open your Paramount Soundbar box.

Open the box and take out the long, white cardboard protective from the top of the box.

Lay the cardboard down and either A) Mark two dots for the mounting holes

Or B) if you don't have a tape measure you can just lay the soundbar on the protective cardboard and mark where the mounting holes are

Place the cardboard on the wall and use as a guide to put wall mounting screws into the wall. Make sure to use the appropriate screws for a sturdy wall attachment depending on the type of wall you are affixing the soundbar to. Also, make sure the holes are even and level with the ground so the soundbar is level. For the best experience, ideally this should be at head level with where you will be positioned when watching TV or using the soundbar for listening to music.

Hang soundbar on the two (2) screws and make sure it's securely attached.
