M A R Q U E E

G E T T I N G S T A R T E D

To begin, press and hold the power button. The speaker will begin pairing, and the LED will slowly blink. Select “LSTN Marquee” from your device’s Bluetooth settings. You’ll hear a confirmation, and then you’re ready to begin enjoying your speaker.

Charge Bank

To use your Marquee as a charging bank, simply plug the device you wish to charge into the USB-A port located on the left side of the speaker, under the cover piece.

The LEDs on the top of the speaker will indicate the charge remaining. Using the charging bank will drain the speaker’s battery at a faster rate.

Charging

Plug your Marquee into any USB charger using the micro-USB port on the left side. The LED under the port will turn red when charging, and will turn off when fully charged.

O P E R A T I O N

-  Power On / Off
-  Reduce volume / Previous track
-  Increase volume / Skip track
-  Mode / Pairing / TWS
-  Play / Pause / Answer / End call

Press and hold the mode () button to disconnect from your device and re-start pairing.

Press play () to answer and end phone calls.

Using the auxiliary 3.5mm cable will automatically override Bluetooth playback. The LED will turn red when using auxiliary mode. You may need to re-pair your Bluetooth device after using the auxiliary input.

See next page for instructions on how to pair two Marquees together for stereo sound.

If you have 2 Marquee speakers, you can pair them wirelessly (TWS) for true stereo sound. To begin, turn on the Marquee and disconnect it from your device (phone, tablet, etc)'s Bluetooth settings.

On one of your speakers, press and hold the mode () button. While holding the mode button, press the other speaker's mode button two times. This will be the "master" speaker. A tone will sound to initiate pairing, and it will take around 5 seconds for the speakers to pair with each other.

When paired, the master speaker's LED will blink

slowly, and the passive speaker's will be solid. Find the Marquee in your device's Bluetooth settings, and pair as normal. If you turn off one Marquee, both paired speakers will turn off.

The paired speakers should re-connect to each other the next time they are turned on. When connected, the LED will blink on the master speaker and remain solid on the passive one.

To disconnect two paired Marquees, double press the mode button on either speaker.

T R O U B L E S H O O T I N G

If you're having trouble connecting: Turning your device's Bluetooth off and then back on helps. You can also press the Marquee's mode button to disconnect from the speaker, and then re-pair from your device's Bluetooth settings.

If your connection is spotty or keeps dropping: Bluetooth works best with a direct line-of-sight. Try repositioning your device in relation to your speaker to improve the connection.

If your Marquee won't charge: Your cable may not be working right. Try a new USB cable, and turn

the case off, then on again.

If you have difficulty connecting 2 Marquees: Try disconnecting your Marquee from your device, turning off both speakers, and turning off your device's Bluetooth functionality. Then, re-start the TWS pairing process from the beginning.

Still can't get it working? Let us know by writing hello@lstnsound.com.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ▶ Reorient or relocate the receiving antenna.
- ▶ Increase the separation between the equipment and receiver.

- ▶ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- ▶ Consult the dealer or an experienced radio/TV technician for help.

Caution

There is a risk of explosion if the battery is incorrectly replaced. Replace only with the same or equivalent type, and do not attempt to replace the battery yourself. Do not expose the battery to excessive heat, including direct sunlight, fires, and the like.
