

NEED A TIGHTER FIT?

We get it - everybody's head is a different size. Luckily, there's a simple fix that helps 90% of people who find the fit too loose. Don't worry - this won't void your warranty, and if you still don't like the fit just email us at hello@lstnsound.co and we'll take care of you.

1) Find this L-shaped angle. You're going to bend this inwards so that the earcups move closer to the center, creating a tighter fit.

2) A little bending goes a long way - make sure to check the fit as you go so you don't over-tighten your headphones.

3) You're all set - make sure to tighten both sides for proper balance. We hope you enjoy your new headphones!
