BY WAC ARTFUL ILLUMINATION

ARTFUL ILLUMINATION FROM WAC

Live your life in color and transform your outdoor space with Colorscaping by WAC. From the subtlest tones of white to vivid, colorful hues, create dramatic lighting effects with the touch of a button. Set the ambiance for any occasion and awaken emotion with our easy-to-use Colorscaping luminaires that provide infinite colors of light to design your personalized experience.

Colorscaping by WAC is a patent-pending smart lighting, power and control system. It is designed and engineered to illuminate your landscape with tunable white light and an endless color palette.

Create bold, personalized lighting experiences to elevate your outdoor space and lifestyle. Color-tune white light to complement your garden and architecture or select custom colors for holiday displays, entertainment and special events.

Colorscaping is easy to install, simple to add to existing systems and easily controlled by MyWAC App.

INFINITE FLEXIBILITY

Using only two-wire conventional landscape wiring, all fixtures can be individually controlled to change both brightness and color.

FULL COLOR SPECTRUM TECHNOLOGY

From subtle tones to bold, vivid hues, pure white light from warm 2700K to cool 6500K and millions of colors mean you can create just the right mood for each outdoor setting with only the touch of a button.

CONNECT VIA APP

Choose custom colors and create scenes, zones and groups by MyWAC App via Wi-Fi or wired ethernet. Schedule your luminaires according to dates/times, special events and dynamic patterns, including sunrise and sunset.

LEGACY PROOF

Make your existing landscape fixtures smart by connecting them to the COLORSCAPING transformer. WAC legacy lighting circuits can be controlled as a single group and automated in MyWAC App. They can be added to schedules or controlled by the app or other supported control systems with brightness control over dimmable fixtures.

TUNABLE WHITE

FULL COLOR SPECTRUM TECHNOLOGY (RED, GREEN, BLUE, WHITE, WARM WHITE)

Colorscaping features advanced RGBWW technology, which uses both warm white and cool white LEDs to offer a wider range of color temperature options (2700K- 6500K), providing greater control over the ambiance of an outdoor space. Transition smoothly between warm and cool whites plus a wide spectrum of colors to easily adjust for different occasions, seasons or moods.

Colorscaping not only provides unlimited color to your outdoor space, but, most importantly, allows you to select the best white light to dramatically illuminate trees, shrubbery, walls, patios, water features and other landscape elements to create a stunning and dynamic outdoor environment.

When you're the artist, color temperatures can be blended around the property to create maximum impact.

WAYS TO ILLUMINATE YOUR LANDSCAPE

WITH COLORSCAPING

- Make a white house "whiter" by lighting it to stand out against other homes
- Schedule beautiful sunrise and sunset scenes to enhance the warmth and beauty of your home
- Tune white light to make evergreen trees greener and Japanese maples redder
- Position luminaires in tall trees to cast a moonlighting effect on the ground and watch shadows change with the wind
- For outdoor entertaining and nighttime activities, use warm white light to deliver an inviting vibe and relaxing atmosphere
- For safety, security, or simply a stunning look, use cooler color temperatures to increase the visibility of your outdoor space

Control legacy / white light products on the same transforme with on/off & dimming control

EASY FIXTURE DISCOVERY

Our innovative and smart transformer allows you to quickly install and test control of luminaries. Cycle through the presets of tunable whites and primary colors.

Offered with 150-watt and 300-watt capacities, the smart transformer enables robust wiring, as well as a surge protector against power surges and voltage spikes.

The transformer eliminates any confusion in the field with a proprietary discovery process—identifying each fixture and location so the luminaires can be added, changed,or paired with the appropriate transformer with the push of a button.

We provide multiple ways to control Colorscaping using Wi-Fi, wired ethernet or DMX.

Easily integrated with lighting and automation platforms via Standard DMX512 Protocol. Transformers are connected using appropriate category wire terminated at the transformer via RJ45 connectors. Each downstream fixture can have its own unique address and controlled independently, or grouped to create outdoor scenes via indoor wall stations or continually shifting schedules.

Smart Magnetic Transformer - PATENT PENDING

Stainless Steel, 15V output, IP65 rated, UL 1838 listed

8300CS-TRN-SS
300W Max

TECHNOLOGY

INDIVIDUAL CONTROL

Operate each run of Color Changing and Tunable White InvisiLED or Pixels independently, or create groups control. User presets allow you to change your lighting scheme on the fly.

SCHEDULE

Create schedules - keep it simple with a 7-day weekly calendar, or get as granular as you want with 365-day calendar that automatically accounts for daylight saving time changes.

COMMISSION

Commission your lighting scenes with our exclusive WAC app. Color and intensity adjustments are easily configured through the app. Then control it from anywhere in the world.

INTEGRATION

Our DMX controller integrates with popular control systems through DMX512-A for Changing Color and Color Temperature adjustment as well as On/Off/Dim functions. Higher level integrations will be made available as these systems update. New functions will be made available through future over-the-air updates.

WALL STATION
SCENE DIMMING WALLSTATION

Featuring one button recall of four scenes, a dedicated off button, and dimming capability, the wall station enables essential lighting control for an area.
The wall station is fully customizable via the WAC app.

Model	Finish	Input	L	W	H	Description
LED-WCT-WT	White	120-230VAC	4⅝"	2¾"	1⅝"	Easy installation and simple way to control lighting. The sleek, aesthetic designs are suitable for all interior locations. Multi-scene selection, Up and Down brightness dimming control, dedicated Off button. Suitable for standard single NEMA wall box. Setup and configuration via WAC app, no physical adjustment needed. Wi-Fi communication is required.
