

# FOR-EVERYTHING RACK (HORIZONTAL) INSTALLATION

- STEP 1:** Hold the rack up against the wall. Using a pencil, mark the hole placements.
- STEP 2:** Drill holes where marked and place in the anchors. If using the provided anchors use a 1/4" drill bit.
- STEP 3:** Hold up the rack, and align the mounting holes with the drywall anchors.
- STEP 4:** Secure to the wall by driving provided screws into each anchor, alternating between screws until each screw is fully tightened to the wall.
-  Do not screw one screw in fully and then the other, as the tension may result in cracking.
- STEP 5:** Once installed, your For-Everything Rack is ready to hold, well... just about everything.

**TOTAL MAX WEIGHT 50 LBS – INDIVIDUAL HOOK MAX WEIGHT 10 LBS**
