Buddha Jumps

SPRING 2024

THE BRAND

We are **TAKE A SHOT**

to take a shot — to make an attempt to do sth.

We are a design collective based in Leipzig, Germany. **TAKE A SHOT** is focused on the creation of accessories and run by young and enthusiastic people. No matter if you prefer the urban or the natural playground: We strive to deliver high quality companions for your everyday adventures.

DESIGN

Our design principle is the mixture of natural materials. The functionality of metal, acetate or synthetics meet the aesthetics of wood and stone. We love the versatility, the structure and the warmth of these organic materials. That's why we incorporate wooden and stone details into all of our accessories. Our watch collections feature dials made of wood and stone and our sunglasses are equipped with temples made of bamboo, cherry, walnut or oak. Nevertheless we protect what we are passionate about: We promise never to use any endangered species.

PHILOSOPHY

We are young. Life is simple. **TAKE A SHOT!** This is the motto it all began with. We are proud of what we accomplished and want to inspire people with our story. The ideas behind our brand are best described by our philosophy: We want people to go out, meet people, explore new places and be open to the wonders of the world.
