POWER AND SIZE OPTIONS

MANUAL

POWER

Every style is available in power or manual recline with two size options for the perfect fit.

Unique gas-assisted footrest allows for smooth, infinite adjustments by gently pulling the lever with the manual recliner.

The power option has a control panel that includes a USB charging port.

The extra-long footrest with chaise ottoman eliminates gaps and provides complete leg support, no matter what your height.

Beautiful stainless steel footrest extension hides all mechanical linkages and accentuates the full-length ottoman.

Both the pillow back and tight back options have an articulating headrest that allows you to find the ideal pillow angle for watching TV and reading.

Back recline and footrest are fully independent of each other, giving you complete control to select your perfect reclining experience.

The round base option allows you to swivel the Comfort Recliner™ to the left or the right 350° for the perfect angle.
