

# SECTIONAL ASSEMBLY INSTRUCTIONS

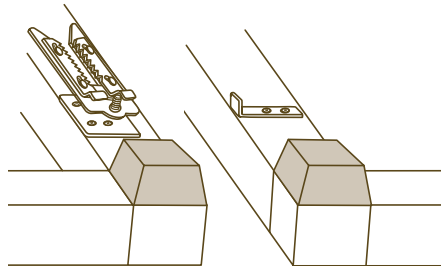

1. To install, secure each bracket on the bottom of the side rail with supplied screws. Align the center of brackets to be 7" from the front rail of the furniture.

2. To assemble, arrange furniture pieces to their permanent position on a level surface. Slide the L bracket into the notched prongs on the left bracket. Push the pieces together until the bracket stops clicking and is snug.

3. To separate the sectional pieces, either lift the L bracket until it is disconnected, or pull the two raised levers on the notched prongs and pull the L bracket away from the connector.

4. To hide the connector if the pieces are separated, rotate the notched prong until it is flush with the side rail.
