### **Experience the difference!**

Features	Benefits
Our main material: solid North American birch	High quality, long-lasting, carefully selected even-grained hardwood
	North American birch from sustainable, biodegradable and renewable trees
8-step finishing process	5 steps more than the standard 3-step process used in the furniture industry
	Superior finish offering much better and longer protection – a solid investment
Toner	Wood grain unified and enhanced, with colour evened
Dinalshield catalysed varnish*	Very hard-wearing varnish added as last coat to ensure greater durability and protection from spills and stains

<sup>\*</sup>The catalysed varnish takes 30 days to harden completely and be fully efficient. You should be careful and avoid scratching the surface for that period of time.

#### **Our 8-step finishing process**

Toner application for even shade of colour

Wood stain application

Stained finish is hand-wiped

Step 04 Uniformity of colour

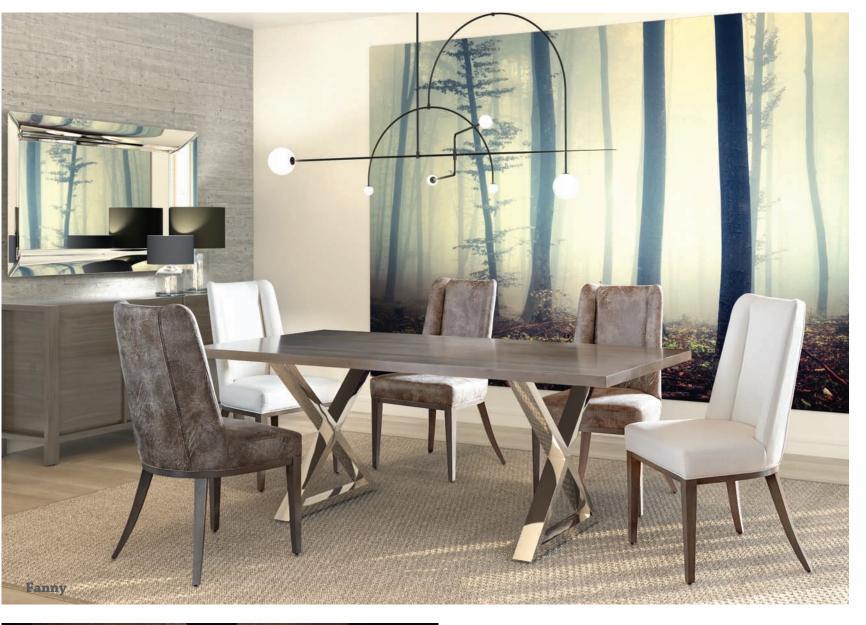

Sanding sealer

Dinashield catalysed varnish

Drying (1h30) at 104 °F

A leader of high performance in wood coating products
