

# Micro-Max™

## Micronutrient supplement for mature horses

Micro-Max is a low-intake concentrated source of vitamins and minerals for mature horses. Micro-Max is ideal for horses that maintain body weight on diets composed entirely of forage or forage and small amounts of concentrate.

Obesity is a growing problem among horses and ponies, and is related to a number of health concerns, including exercise intolerance, joint problems, and metabolic disorders. In order to keep horses in moderate body weight, they are often given rations with insufficient vitamin and mineral fortification. This is sometimes the case when fortified feeds are fed at levels below their recommended feeding rates.

The use of Micro-Max ensures that all vitamin and mineral requirements of mature horses and ponies are satisfied. Because of its low feeding rate, Micro-Max can be fed by itself or mixed with a concentrate.

## Features and Benefits

- Low-intake source of vitamins and minerals
- Includes minerals that have been chelated or proteinated, which increases their digestibility and allows horses to derive maximum benefit from them
- Fulfills the vitamin and mineral requirements of horses and ponies on all-forage diets or that consume less than the recommended daily amount of fortified feeds
- Features yeast culture to enhance digestion of fiber and other nutrients
- Contains natural-source vitamin E
- Pelleted with an alfalfa base for great palatability

## Feeding Recommendations

Feed 120 g per day to horses or 60 g per day to ponies that consume rations consisting of forage only or forage and unfortified grains. For horses and ponies consuming a fortified feed at less than the recommended rate, please use this product proportionally (e.g., if a horse is fed half of the recommended feeding rate of a fortified concentrate, feed half of the recommended amount of Micro-Max.)

## Servings and Container Sizes

Serving size: 120 g

Container sizes: 4.5 kg (37 to 75 servings)

13.6 kg (113 to 225 servings)

## Guaranteed Analysis

	per 120 g
Calcium	3,000 mg
Phosphorus	2,000 mg
Magnesium	1,200 mg
Iodine	1.9 mg
Selenium	1.9 mg
Copper	145 mg
Zinc	440 mg
Manganese	240 mg
Iron	185 mg
Vitamin A	42,290 IU
Vitamin D	4,229 IU
Vitamin E	380 IU
Biotin	0.5 mg

“My show horse only requires three pounds of feed per day to maintain condition, but I know that doesn’t provide him with all the vitamins and minerals he requires for a balanced diet. Micro-Max is the perfect solution to top-up his nutrients without adding unnecessary calories.”

-Wallace Battles
