

Preserve™ PS

Prescription strength antioxidant supplement

Muscle damage is a constant risk in working horses, leading to reduced performance or inability to work. Preserve PS contains a proven mixture of antioxidant agents and essential nutrients that supports normal muscle function during even the most strenuous exercise, and speeds muscle recovery after work, reducing downtime between performances. Preserve PS features natural-source vitamin E for superior bioavailability.

Elite Advice

“Preserve PS helps Heraldic maintain proper immunity and aids in recovery during the strenuous travel and competition of endurance events.”

-John Crandell III,
Winner of the Tevis Cup

Features and Benefits

- Supports muscle recovery after work, reducing downtime between performances
- May assist in the prevention of muscle soreness in performance horses
- Helps to maintain a healthy immune system
- Aids in recovery after injury or illness
- Features natural-source vitamin E for superior bioavailability
- Important for horses on selenium-deficient pastures

Feeding Recommendations

Top-dress on feed. Feed 30 g per day for maintenance. Feed 60 g per day after strenuous exercise or recovery from an episode of tying-up. These recommendations are for horses with a mature body weight of 1,100 lb (500 kg).

Servings and Container Sizes

Serving size: 30 g (30-g scoop included)

Container sizes: 3 kg (100 servings)

Guaranteed Analysis

	per 30 g
Vitamin E	1,500 IU
