## CLIMACAB SET UP AND USE

### **Introduction:**

WE APPRECIATE YOUR BUSINESS! We'd like to start out by saying THANK YOU for purchasing a ClimaCab From Acoustic Remedy.

You now own the best in multi-instrument display available in the world and have taken a crucial step to protecting your instruments for many generations to come.

Included in this document are basic set up and use instructions, although your ClimaCab is virtually ready to use almost immediately. If you have any questions during the set up process, don't hesitate to reach us via phone or email.

Contact information is included on page 6 of this document and also on our website at [www.acousticremedycases.com](http://www.acousticremedycases.com). Navigate to the Contact tab on the main menu.

### **Disclaimer:**

Depending on the type of ClimaCab you purchased, there may be slight variations to the ClimaCab Set Up & Use. Where applicable, we have done our best to address these as necessary and may send you additional information via email as needed. In the majority of situations, these general guidelines will get you started within approximately 15-20 minutes.

### **Help Us Help Others:**

If you find any errors in this ClimaCab Set Up & Use document, please don't hesitate to send us an email and let us know. We thank you in advance for your input.

### **Important Information Before You Begin:**

PLEASE NOTE: If there are any damages to the ClimaCab, please call us immediately. We have fully insured each shipment and time is of the essence in reporting damages.

Adam, Co-Owner: 608-406-9860

Ryan, Co-Owner: 651-341-9955

Additionally, you can email us at [acousticremedycases@gmail.com](mailto:acousticremedycases@gmail.com). As we learn more about the damages and begin filing claims, we will work with you to determine the next steps in getting a replacement at no cost to you. Each situation is unique and we ask for your patience in putting solutions in place.

### **Packing List:**

#### **STANDARD COMPONENTS**

- ClimaCab
- Vigilant humidifier (needs to be filled and plugged in upon receipt) as primary humidification source
- Boveda 49% 2-Way Humidity Control Packets as secondary humidification source
- Boveda Cedar 2-Packet Holders
- Ultra warm powered and dimmable LED light strip fully installed
- Remote for LED light strip
- Door hardware (pre-drilled, needs to be re-installed upon receipt)

#### **STORAGE SYSTEM SPECIFIC COMPONENTS**

- Adjustable neck holders and bout rest rails
- Cross support bars for front facing option
- Top rail hangers
- Slat wall hangers

# ACOUSTIC REMEDY

## CLIMACAB SET UP AND USE

### Three Types of Storage Systems:

Please determine the appropriate storage system you selected with your ClimaCab.

#### **Top Rail Hanging System**

The Top Rail Hanging System includes a wood rail permanently affixed to the ceiling of the ClimaCab. It utilizes String Swing hangers attached to trapezoid shaped blocks. The blocks slide along rail and are removable at on the right side of the rail.

#### **ProHang System - Top Rail + Slat Wall**

The ProHang System includes the top rail with slat wall along the back of the ClimaCab. All slat wall is hardwood runs from top to bottom and utilizes Sting Swing's slat wall hangers in addition to the previously mentioned top rail hangers.

#### **Neck/Bout Rest System**

The Neck/Bout Rest System includes cork lined bout rest rails which magnetically attach to permanently affixed rails on the floor of the ClimaCab. Additionally, a rail is mounted along the back of the cabinet which secures the cork lined hardwood neck holders magnetically to a power coated bar routed into the rail.

**When selecting your set and use instructions, please pay attention to which system the instructions apply to.**

Note: If you elected for Deluxe Service, the shipping company should remove the shipping crate and debris at no cost following placement in a first floor room of choice. Please skip to Step 8.

### Set Up and Use Directions:

- 1.) To begin, move the foam lined crate near the final use location. The crate is constructed of 3/4" plywood and each piece is secured with screws. Locate the front panel and remove it using a drill or screwdriver with appropriate Phillips head drill bit. Set the front panel aside.
- 2.) Once the crate is open, remove the foam piece behind the front panel and set aside.
- 3.) Repeat the process with the sides and back pieces of plywood and foam pieces to gain full access to the ClimaCab. At this point the ClimaCab should be sitting on the base of the crate.
- 4.) The easiest method to remove the ClimaCab is to have one person at each the left and right side. Carefully grab near the front corners and place the other hand on the back of the ClimaCab.
- 5.) With knees bent, lift the ClimaCab slightly off the base and set on the floor adjacent to it.
- 7.) Once uncrated, please inspect the entire cabinet for any damages during shipping and contact us ASAP upon discovery of any damage. We will work with you to solve any issue big or small, so please don't hesitate as time is of the essence in making insurance claims against the shipping company.

## CLIMACAB SET UP AND USE

### Set Up and Use Directions (continued):

8.) Open the bottom storage compartment doors to locate two boxes. Included in one box are the accessories, including String Swing hangers (both top rail & slat wall), cork lined bout rails, neck holders, any specialty hangers, the wood cover plate, Boveda Packet holders, the LED light remote, handles, and other accessories which will require short installation during the set up phase are include. In the other box is the Vigilant humidifier.

9.) Carefully unpack the hangers and begin to insert them either into the top rail, slat wall, or in the case of the Bout/Neck Rest storage option, into the Neck Rest rail mounted along the back of the cabinet . If inserting into the top rail, locate the opening on the top right side of the ClimaCab. The wood block will slide into the opening and opposing angles will keep it secure. If inserting into the slat wall, the black plate has a small lip on the upper edge which you can tilt into the opening between the slats. If inserting into the neck holder rail, hold the neck rest horizontal and line up magnets to lock in place.

10.) Once the hangers are inserted, put them into the approximate location along the top rail, slat wall, and neck holder rail.

11.) Remove the humidifier from the box and place into the recessed portion in the floor of the ClimaCab. The orientation of the humidifier should be such that the water reservoir opening is toward the back for the ClimaCab.

### Set Up and Use Directions (continued):

12.) Thread the yellow wire dangling inside the recessed box onto the nut on the top of the humidifier. Plug in the cord leaving the back of the ClimaCab (which is from the power supply strip mounted inside the humidifier box) into a standard outlet. Ensure that the light on the power strip is illuminated by looking for the orange indicator light. If not, turn on power strip. Ensure the LED light strip and humidifier power supplies are plugged into the power strip. At this point, you should see the LED light strip illuminated and the humidifier control box displaying temperature, humidity, and a red indicator light illuminated indicating that the unit needs water in the reservoir.

13.) Fill the humidifier to the max fill line with distilled water. NOTE: you can fill the reservoir with less water and the red indicator light will shut off once the minimum amount has been inputted. Once the desired amount of water is inside the reservoir, place the slotted wood cover plate over the opening. If your ClimaCab has the Bout/Neck Rest System, place the cork lined bout rests into place by locating the small notch on the bottom side and placing that over the permanently affixed rails on the floor of the ClimaCab.

14.) Turn the knob on the controller mounted on the back wall of the ClimaCab. Follow the Vigilant Owner's Manual to dial in the proper humidity levels. This is a separate document that is provided by Acoustic Remedy and is available by scanning the QR code on page 5 and on our website under Support tab from the main menu.

## CLIMACAB SET UP AND USE

### Set Up and Use Directions (continued):

15.) Place the Boveda 2-Way Humidification packets into the pre-mounted cedar packet holders. These are mounted along the center bar on the Traditional and larger ClimaCabs.

For the Petite size, use the included magnet and/or velcro pads and install the mounting hardware by using the included instructions from Boveda. Additionally, a common location to store the packet holders is along the back bottom of the ClimaCab floor.

16.) Begin placing your guitars into the hangers in any configuration you desire. All String Swing hangers used in the Top Rail Hanging System can pivot 180 degrees at the yoke.

Certain slat wall hangers pivot at the yoke and near the powder coated plate while others are straight fixed arms of various lengths. The pivoting allows for multiple storage configurations. For the Bout/Neck Rest System, space the bout rails at appropriate distance apart for your guitar bouts. For electrics, they will need to be closer together and for larger bodied acoustics farther apart.

Also, the further from the neck holders, the more angled they will be to come into the holder and may create issues with the strap pin on the bottom of the guitar. It's best to keep them close to the back of the ClimaCab as possible. Align the neck holder with the neck of the guitar once it's placed in the bout rails.

17.) On the two door models, the gasket will be compressed by magnets on the back side of the door and opposite poled on the center bar. On the one door models, latches opposite of hinge side will accomplish this important task.

### Set Up and Use Directions (continued):

18.) We recommend keeping the doors shut at all times when not adding/removing guitars or performing cleaning, maintenance to the humidifier and other necessary tasks to keep your ClimaCab operating at optimal levels.

### **Other Acoustic Remedy Products:**

- ClimaStand: floor standing, single instrument humidior
- ClimaCase: wall mounted, single instrument humidior
- String Stands: SoloStand, DualStand, and DualStand Deluxe
- String Racks: available in Petite (32"), Traditional (48"), and Grand (64")
- Wood Guitar Picks: explore your tone options with handmade picks in a variety of hardwoods
- Pedal Boards: hardwood pedal boards are a unique option to add some class to your music space.
- Musician Seating: stools and stairs to sit and strum on

### **Thank You Once Again!**

By doing business with Acoustic Remedy, you are not only supporting the two owners and their families but also our Amish builder's family.

In turn, we also support numerous small business during the course of running our business and appreciate all the hard work and efforts that go into the day-to-day operations that keep things ticking.

As a way of saying thanks, any one of our current customers is automatically granted a 10% discount on future purchases, with certain exceptions applying.

In addition, we encourage you to show our products to your friends and family, especially the musicians you know! Please let them know that we have Friends & Family discounts that are available if they are referenced by a current customer. As our way of saying thanks for those new customers who purchase something from us, we will send you a small thank you gift.

We love what we do and can't thank you enough for supporting us. We hope you have many years of enjoyment with your Acoustic Remedy product, as they are all designed to last a lifetime and then some.

Take care and strum on!
