# Mamapod™ Baby Carrier S200 Quick Guide

If baby faces inward, keep wrapper side extension, adjust position if prefers by flipping open the seat top layer

Apply upward force to unfold seat

Place hip seat in front, loop waist strap through waist pad & suspenders, secure buckle with click sound, tighten straps. Only a snugly fit waist belt can bear weight.

Pull up wrapper with baby legs on each side of the opening. Support baby w arm

Put on shoulder straps while support baby, pull in extra webbing. Support baby with arm

Connect back buckle secured by a click sound. Adjust buckle position for easy reach

If baby faces outward, fold & button the wrapper side extension

Flip open seat velcro layer under top layer  
Remove wrapper side extensions

Fold & button wrapper side extension. Velcro back seat top layer

## Support Pole

Retrieve support pole from seat pocket

Unfold support pole  
Loosen secure ring;  
Adjust length using push button control;  
Tighten / lock secure ring before use.  
Add extra leg segment for longer length

Used when baby faces in or out in the front

Attach support pole:  
- Open snap pocket under seat, expose through hole  
- Position support pole under through hole  
- Lift & push up support pole to seat level  
- Support pole should snap & attach easily  
- Retry until successful.

### IMPORTANT!

READ INSTRUCTION CAREFULLY BEFORE USE. FAILURE TO FOLLOW INSTRUCTION MAY RESULT IN SEVERE INJURY.

KEEP INSTRUCTION FOR FUTURE REFERENCE

WARNING! USE SUPPORT POLE ONLY WHEN STANDING AND NOT MOVING. ALWAYS PROTECT BABY WITH ARM. DO NOT LEAVE BABY UNPROTECTED
