

KISS-CUT CORK BUTTON ROLLS

Features:

Our Cork Button Rolls are made in both 1/16" and 1/8" Thicknesses. For extra durability these rolls use our 201A Material. Sold in Quarter Size or Full rolls, this material has a pressure sensitive adhesive on one side, kiss cut to a liner for easy application. The adhesive will hold to most surfaces but is removable if the cork is damaged or replacement is needed over time.

Applications:

Our Kiss-Cut rolls are perfect for applying under various Home décor that may be placed on tables, desks, or other furniture to prevent scratching and or discoloration that may be caused by traditional bumpers.

Users:

- Furniture Stores
- Moving Companies
- Home Décor manufacturers
- Decorators and designers
- Janitorial and Operations Departments

Composition: Cork with Urethane Binder

Cork 202A:

Our 201A material is a more fine and flexible version of our 201M for more technical or durability needs. Typically, custom made per order, our 202 A has a consistent grain from batch to batch.

Technical Specifications:

Cork Type	201A
Density LBS	10-13
Granular Size	0.5/2mm
Tensile Strength PSI	200
Compression Set	35-55
Recovery %	70 min
Flexibility as REC	F=5
Disintegration (Boiling Water) 3hrs	None
