# BRAZIL SWISS WATER DECAF

PRODUCER	Swiss Water
REGION	Minas Gerais
VARIETAL	Arabica
PROCESSING	Washed
ALTITUDE	1000-1200 masl
ABOUT	Coming from the largest coffee-producing nation in the world, this Brazilian decaf uses the Swiss Water decaffeination process which is a 100% chemical-free decaffeination method. Using pure water, the caffeine in coffee beans is gently removed until they are 99.9% caffeine-free, without compromising the coffee's unique body, flavour, and aroma characteristics.
