

BLING-BLING COLLECTION

CHARACTERISTICS:

Bling-Bling is a high-powered metallic created with the application of heat-transferred foil, resulting in a shimmery brilliance. Its heavy pebbled texture adds a touch of pizzazz. Bling-Bling is supplied in half-hides.

CARE & CLEANING:

Semi-aniline leathers are simple to maintain. Dust regularly or vacuum with a soft bristle attachment.

Spilled liquids should be removed immediately by dabbing with a cloth (do not rub). If additional cleaning is required, apply soapy water with a damp cloth and then rinse by wiping down with clear water. Do not use commercial cleaning agents. For difficult stains, it is always best to contact a specialist as damage may occur due to improper cleaning.

For optimum performance and longevity, do not place your leather furniture within twelve inches of a heating source or in sustained direct sunlight.

HIDE DIAGRAM:

A NOTE ON SEMI-ANILINE LEATHERS:

Semi-aniline leather is ideal for contract and residential use, as it is washable with soap and water, extra free of defects, and expertly selected for maximum yield.

To determine the most appropriate leather for your unique application please call us at 212.736.3360. We love to talk about leather!
