

DORMIA COLLECTION

CHARACTERISTICS:

Only the best selection of hides is used to produce this exquisite pure-aniline leather. Lightly finished with a waxy topcoat, the natural grain of the hide really shows through. The result is a leather that is authentic, with a rich translucent coloration.

SPECIFICATIONS:

Average Hide Size:	65 square feet
Average Thickness:	0.9 -1.1 mm
Finish:	Aniline-dyed wax finish
Grain Character:	Smooth
Grain:	Full grain
Flammability Testing:	CA-117, NFPA-260

COLORWAYS:

Parchment

Sand

Aloe

Butte

Blush

Brandy

Cognac

Mellow Brown

DORMIA COLLECTION

COLORWAYS:

Patina

Earthen

Brazil

Redwood

Coal

Bluestone

Sky

Grey

DORMIA COLLECTION

CARE & CLEANING:

Leather is a luxurious, durable material that will maintain its beauty for many years with proper care. Aniline leathers are tanned and dyed without added finishes or protection and develop a beautiful patina with use.

Dormia should be dusted regularly with a soft cloth or vacuumed with a soft bristle attachment. Remove spilled liquids by dabbing with a clean cloth (do not rub). For difficult stains, it is always best to contact a specialist as damage may occur due to improper cleaning.

For optimum performance and longevity, do not place your leather furniture within twelve inches of a heating source or in sustained direct sunlight.

HIDE DIAGRAM:

A NOTE ON ANILINE LEATHERS:

Full aniline leathers display all of the natural beauty of the hide, including neck wrinkles, stretch marks, spines, insect bites, and scars. As with stained natural hardwoods, leather shows shading variation in and between hides. These characteristics are part of the leather's beauty and are not considered defects.

To determine the most appropriate leather for your unique application please call us at 212.736.3360. We love to talk about leather!
