

# LUMINA COLLECTION

## CHARACTERISTICS:

Imported from Italy, Lumina is the quintessential “tipped” leather: the raised surface of the grain is highlighted with a color that contrasts with the valleys, creating a dynamic look that is full of depth. The light transparent finish adds a warm glow. Because of added protections, it is ideal for any commercial or residential application.

---

## SPECIFICATIONS:

Average Hide Size:	55 square feet

## LUMINA COLLECTION

### CARE & CLEANING:

Semi-aniline leathers are simple to maintain. Dust regularly or vacuum with a soft bristle attachment.

Spilled liquids should be removed immediately by dabbing with a cloth (do not rub). If additional cleaning is required, apply soapy water with a damp cloth and then rinse by wiping down with clear water. Do not use commercial cleaning agents. For difficult stains, it is always best to contact a specialist as damage may occur due to improper cleaning.

For optimum performance and longevity, do not place your leather furniture within twelve inches of a heating source or in sustained direct sunlight.

#### A NOTE ON SEMI-ANILINE LEATHERS:

Semi-aniline leather is ideal for contract and residential use, as it is washable with soap and water, extra free of defects, and expertly selected for maximum yield.
