

# SAUVAGE COLLECTION

## CHARACTERISTICS:

This is classic sauvages leather with a modern twist. Its two-toned mottled appearance is enhanced with a brilliant sheen. The depth and character of this leather are created by blending several complementary colors during the dyeing process, then hand-wiping the hides to achieve its distinctive antique character.

---

## SPECIFICATIONS:

Average Hide Size:	50 square feet
Average Thickness:	1.0 - 1.2 mm
Finish:	Aniline-dyed sauvages with sheen
Grain Character:	Smooth
Grain:	Full grain
Flammability Testing:	CA-117, NFPA-260

### CARE & CLEANING:

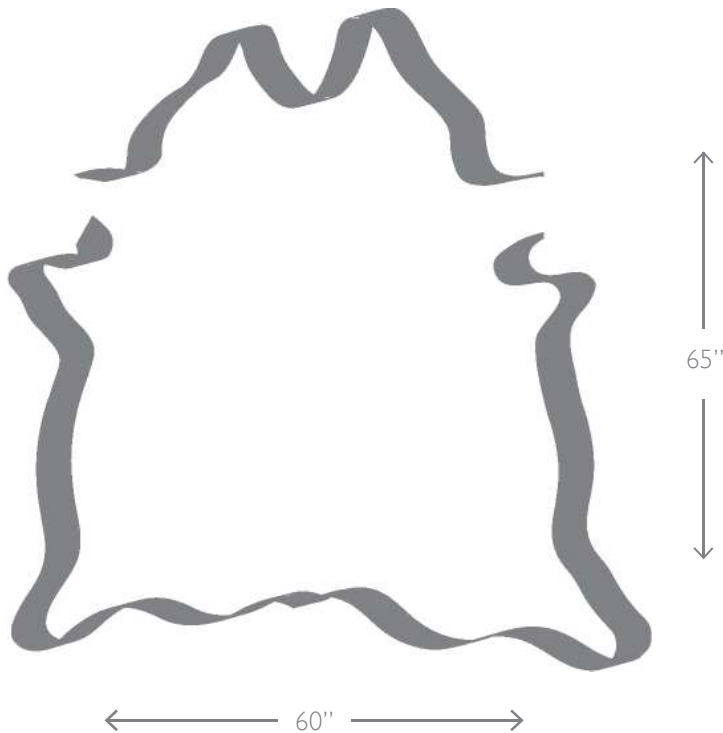

Semi-aniline leathers are simple to maintain. Dust regularly or vacuum with a soft bristle attachment.

Spilled liquids should be removed immediately by dabbing with a cloth (do not rub). If additional cleaning is required, apply soapy water with a damp cloth and then rinse by wiping down with clear water. Do not use commercial cleaning agents. For difficult stains, it is always best to contact a specialist as damage may occur due to improper cleaning.

For optimum performance and longevity, do not place your leather furniture within twelve inches of a heating source or in sustained direct sunlight.

#### A NOTE ON SEMI-ANILINE LEATHERS:

Semi-aniline leather is ideal for contract and residential use, as it is washable with soap and water, extra free of defects, and expertly selected for maximum yield.
