

# TEMPE COLLECTION

## CHARACTERISTICS:

Imported from Italy, Tempe is another one of our “tipped” leathers. This distinctive dual-toned leather is created by dyeing the raised surface of the grain with a tone-on-tone coloration, creating a dynamic look. The light transparent finish adds a subtle sheen. Due to added protections, it is ideal for any commercial or residential application.

---

## SPECIFICATIONS:

|                       |                           |
|-----------------------|---------------------------|
| Average Hide Size:    | 55 square feet            |

## TEMPE COLLECTION

### CARE & CLEANING:

Semi-aniline leathers are simple to maintain. Dust regularly or vacuum with a soft bristle attachment.

Spilled liquids should be removed immediately by dabbing with a cloth (do not rub). If additional cleaning is required, apply soapy water with a damp cloth and then rinse by wiping down with clear water. Do not use commercial cleaning agents. For difficult stains, it is always best to contact a specialist as damage may occur due to improper cleaning.

For optimum performance and longevity, do not place your leather furniture within twelve inches of a heating source or in sustained direct sunlight.

#### A NOTE ON SEMI-ANILINE LEATHERS:

Semi-aniline leather is ideal for contract and residential use, as it is washable with soap and water, extra free of defects, and expertly selected for maximum yield.
