doozie layout and color guide for cement & ceramic tiles

# doozie size and color specifications

8 x 8 inches = 0.44 sq. feet per tile

20 x 20 centimeters = 0.04 sq. meters per tile

#### info and design consultation

Please visit the tile info section on our website for more details on specs, testing, installation, and commercial orders. We are happy to help calculate quantities plus necessary overage and to assist you in your customized tile layout. Please email info@aimeewilder.com.

We recommend a 20% overage on all tile orders.

<sup>\*</sup>Color and size are customizable for this product.

It is important to note that in each colorway there are 2 tiles with the same colors that are swapped. The tiles are not labeled so it's important to be comfortable with which tiles are A and B.

Please tell us at info@aimeewilder which layout you would like and we can help you with which tile numbers to purchase.

# doozie wavelength layout

32"

10.67 ft<sup>2</sup>

48"

Lay the tiles at the same orientation, alternating rows of A and B tiles as you go down.

\* You can use multiple colors for this layout-match the bottom color of the tile on top to the top color of the tile below.

Lay the tiles alternating with right side up and upside down going accross, alternating rows of A and B tiles as you go down.

right side up

upside down

## doozie wavelength + solid square layout

48"

 $18.67~\mathrm{fl}^2$ 

#### layout

On the left of the solid tiles, turn the doozie 90 degrees clockwise and alternate like the regular wavelength pattern. Lay the desired amount of solid square tiles with a color that corecponds with the color top of the doozie tile. Repeat on the right side by turning the doozie tile 90 degrees anti-clockwise.
