

Power Certification Form - 16.50 / 16.87 SmartShred

The intimus® models 16.50/16.87 SmartShred shredder/baler combinations all require a 220Volt, 3-phase, 60 cycle power source fused at 50 AMPS per phase. These shredders come with a 3-pole, 4-wire, grounded Hubbell CS8365C plug.

This plug requires usage of a matching locking connector, Hubbell CS8369 or equivalent. Only one line is required to run the shredder/baler combination. The voltage should not vary more than plus or minus 5 volts under full load.

Please note: Any charges incurred as a result of incorrect voltage information is not the responsibility of Intimus International North America, Inc. whether corrections are made either in-house or in the field. Powering this unit on a circuit different than that is detailed above may result in a lower machine speed, reduced capacity, and/or machine damage.

We require this information as soon as possible in order to get your equipment shipped on schedule. Your shipment will not be scheduled until this form is completed and returned.
