

# GUARDIAN DRAIN-LOCK™

## Installation Guide

### Tools Needed

You will need the following tools to properly secure the Guardian Drain-Lock:

- ✓ 3/8" Ratchet
- ✓ 3/8" Ratchet Extension
- ✓ Tamperproof Torx Key (#40 for 2" and #45 for 3" & 4" drain-locks)
- ✓ Rag

### How to Install

- Clean the floor sink of debris and grim build up within the throat of drain. (Photo#1)
- Determine the appropriate size Guardian Drain-Lock to be installed: 2", 3" or 4". If any of these sizes do not fit in your floor sink contact TNT Products at 818-515-1001. Once size is validated, place the Guardian Drain-Lock in the hole of the floor sink. *Note: If you are using the Guardian Hybrid line the sticky tape can be removed to allow for a better fit*

- Assemble the ratchet, ratchet extension and tamperproof key. Determine which tamperproof key will be needed to secure the desired Guardian Drain-Lock. #40 key for 2" and #45 for 3" and 4".
- While holding down the drain-lock with one hand, insert the driver and key into the tamperproof bolt and tighten (clockwise) until firmly secured. Do not over tighten use judgment. (Photo #2)
- All locations are built differently and may need additional tools to reach the floor sink. Floor sinks may also differ in shape not allowing for the Guardian Drain-Lock to fit properly. If this is the case for you, contact TNT Products at 818-515-1001.

### Monitoring the Drain-lock

- Once the Guardian Drain-Lock is properly secured and locked there should be no need to remove it other than for sanitation purposes. As needed use soapy hot water and a plastic brush to clean the drain-lock of any built up grim. If the drain-lock is to be removed for cleaning; wash it by hand at the nearest dump sink or run it through your dish machine. Before re-installing make certain all parts are in good conditions.
- Monitor that your Guardian Drain-Lock's are in place and secured/locked in place once a week to guarantee protection of your drain pipes.

**IMPORTANT:**

In printing this Template Guide to your inkjet or laser printer, it may have been reduced or enlarged to fit within the print area of your printer. Please verify the accuracy of your print by comparing this ruler with an actual ruler.
