

# mTape<sup>®</sup> Thunderbolt LTO-6

The World's First Thunderbolt LTO-6 Tape Drive

mTape is a desktop LTO-6 tape archiving solution that connects to any Thunderbolt equipped computer for effortless backup and archiving of critical media assets.

LTO-6 is an industry standard tape format that offers a shelf life of up to 30+ years (significantly longer than spinning disk or SSD technology) and is the most cost-effective storage medium on a cost per TB basis.

mTape LTO-6 supports the Linear Tape File System (LTFS). LTFS mounts the LTO-6 tape drive in the same way as a disk drive. This enables drag and drop functionality to the LTO tape cartridge.
